Introduction

This User Guide has been designed to assist users who are installing and activating software license keys for a Visual Components product.

System requirements

The updated system requirements for using a Visual Components product, can be found at:
<https://www.visualcomponents.com/system-requirements/>

Installation Requirements

For a successful installation you will need:

- Visual Components product installer
- Software license key

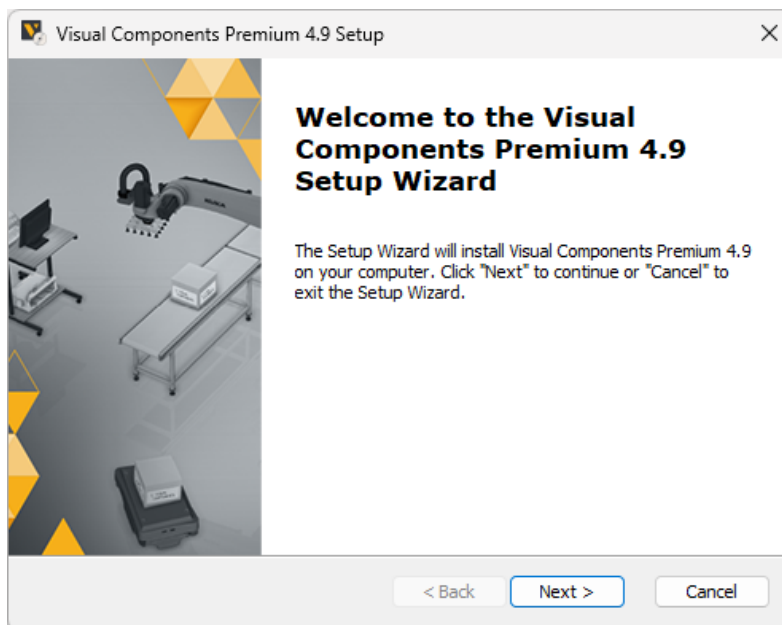

A software license key can only be activated for a specified product and version. We recommend that prior to installation, you confirm for which product and version your license key is intended.

Installation

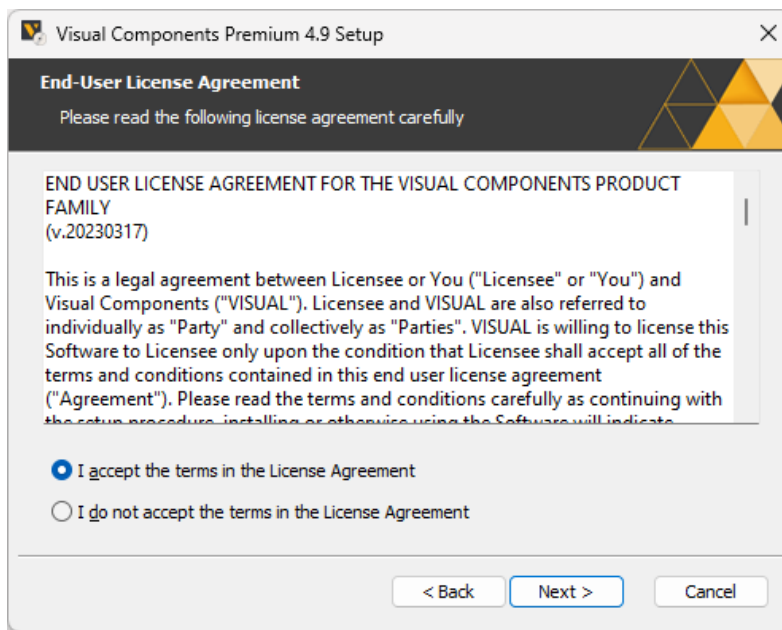

To install Visual Components, you will first need to visit the [downloads page](#), to download the installer for your product and version.

Installing Visual Components

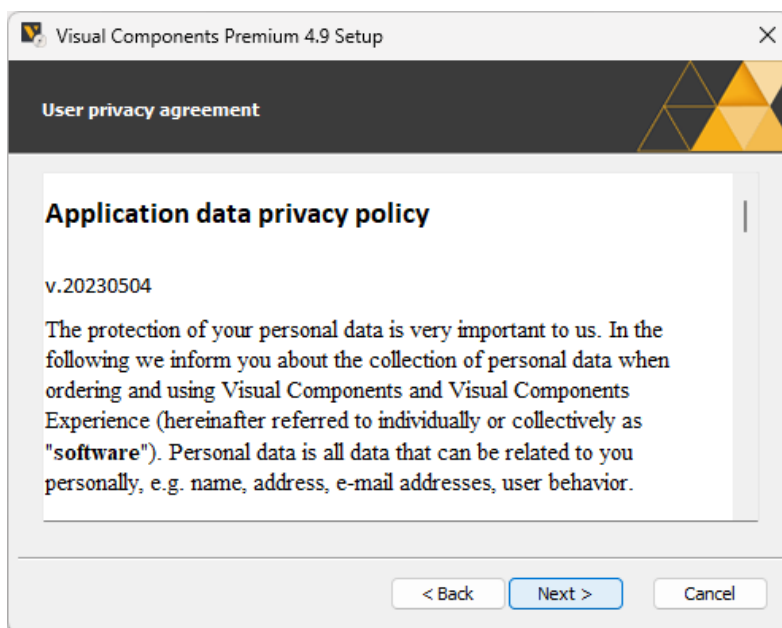

1. Begin by running the installer, then on the **Setup Wizard** dialog, click **Next**.

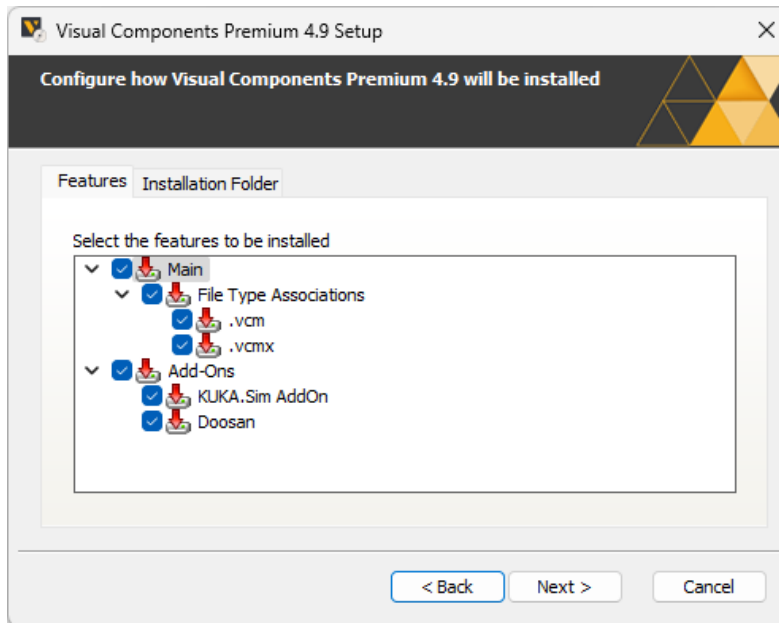

2. On the **End-User License Agreement** dialog, read and accept the terms, then click **Next**.

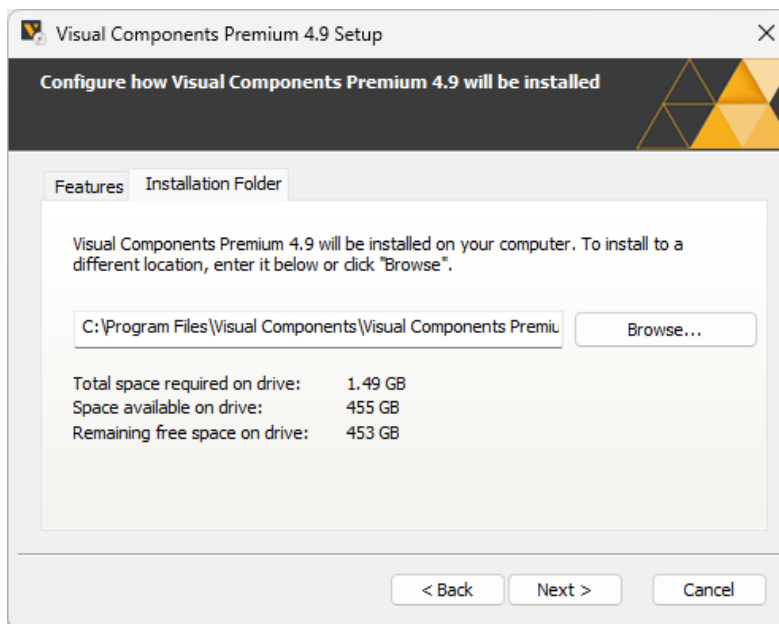

3. Review the privacy policy and click **Next**.

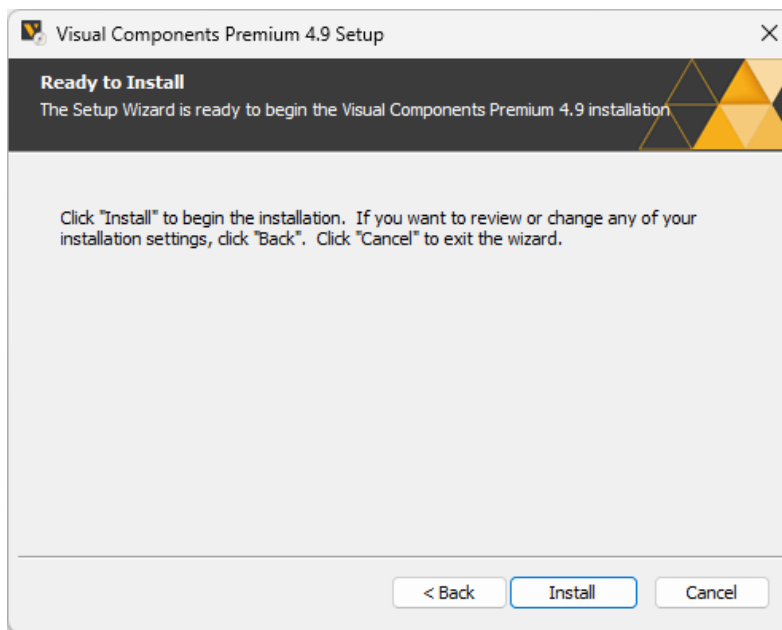

4. In the **Features** tab of the **Configure** dialog, you may disable the **File Type Associations** for this application. And you may also if necessary, disable the **KUKA.Sim** or **Doosan Add-Ons**.

And In the **Installation Folder** tab, accept the default location, or click **Browse** to set the location of your Visual Components program files, then click **Next**.

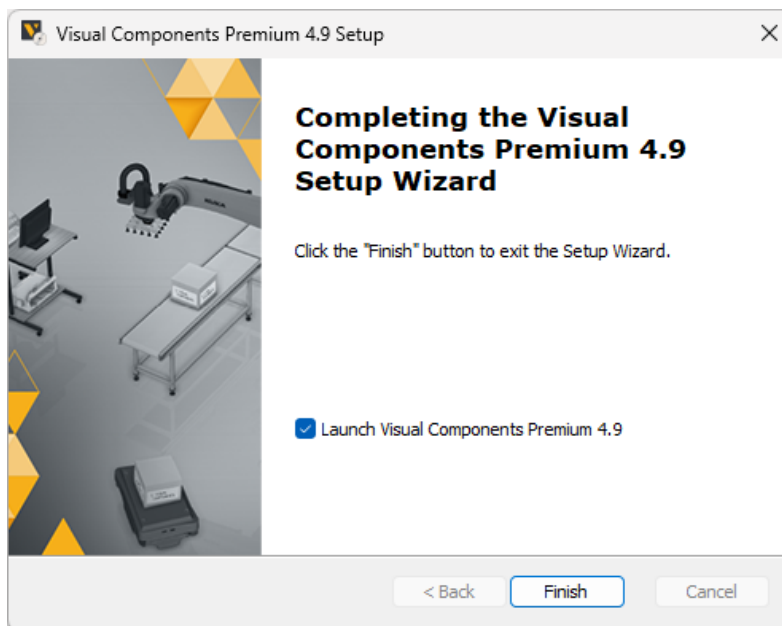

5. Then click **Install**.

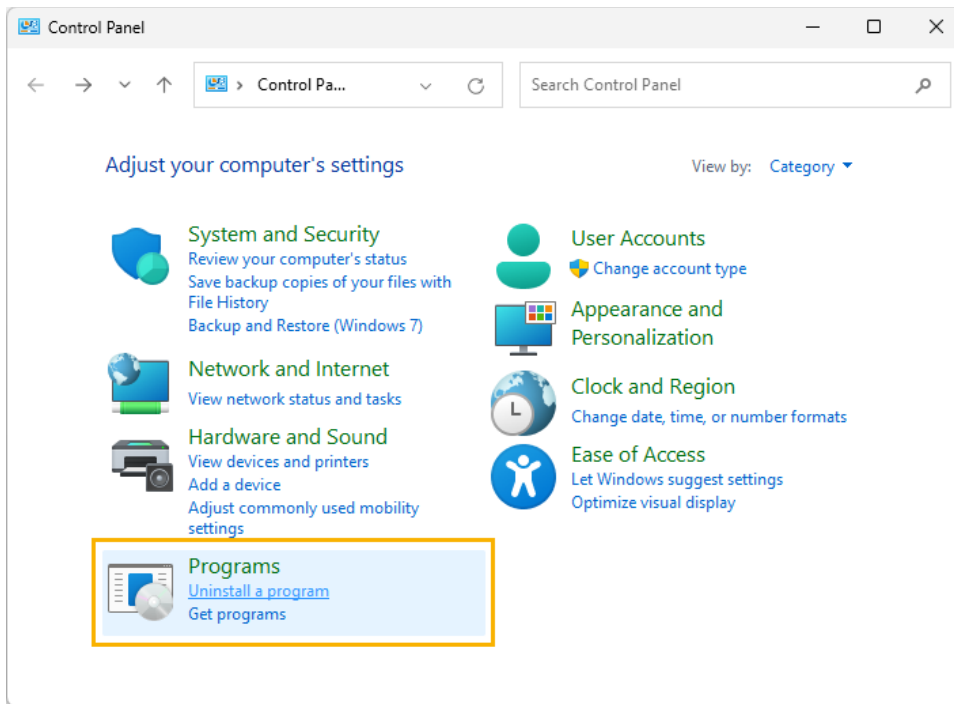

6. Then click **Finish**.

Note: Uncheck the *Launch* option if you do not wish to launch the application right away.

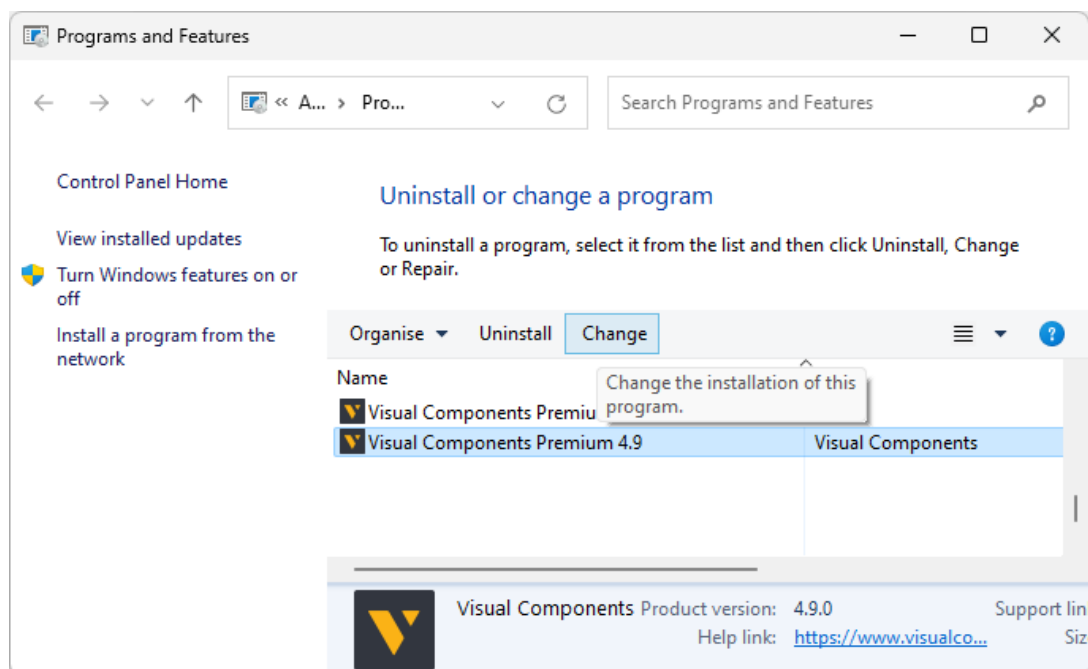

Uninstall or Change Visual Components

Begin for example by launching the Windows Control Panel and access the **Uninstall a program** options.

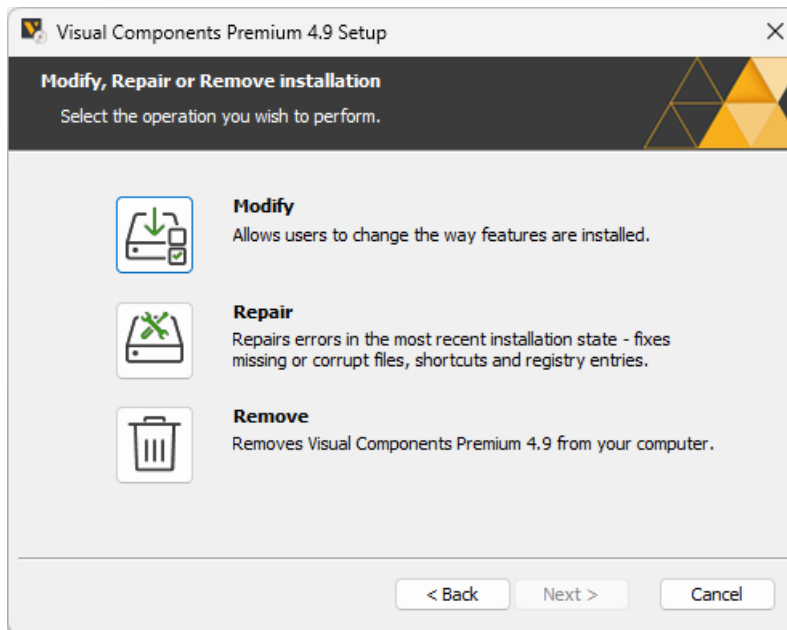

Change

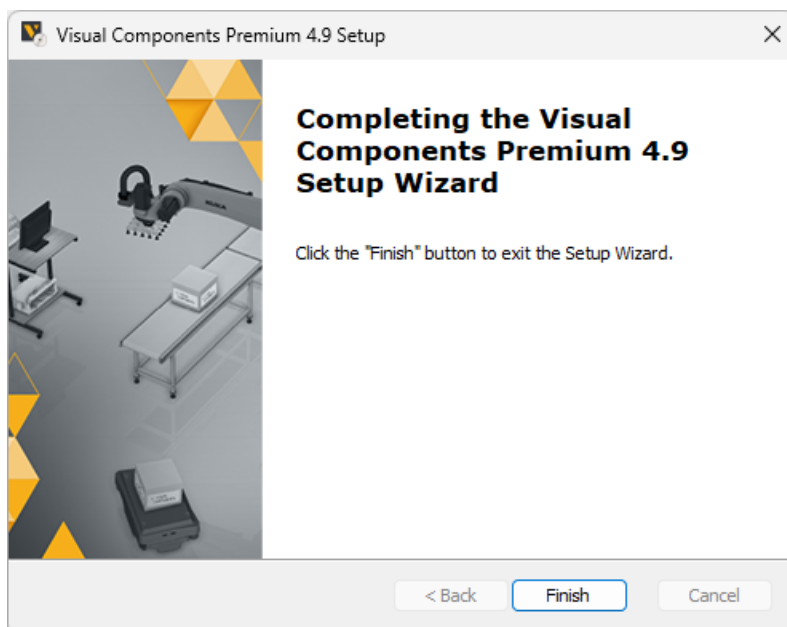

1. In the **Uninstall or change a program** panel, select the Visual Components product you wish to remove, then click **Change**.

2. On the **Setup Wizard** dialog, click **Next**.
3. On the **Modify, Repair or Remove installation** dialog, you may select the following options:
 - Select **Modify** to enable or disable application features. See installing [Features](#).
 - Select **Repair** to repair the application. This process reinstalls the application to replace any missing files.
 - Select **Remove** to remove the application and files. See [Remove Visual Components](#).

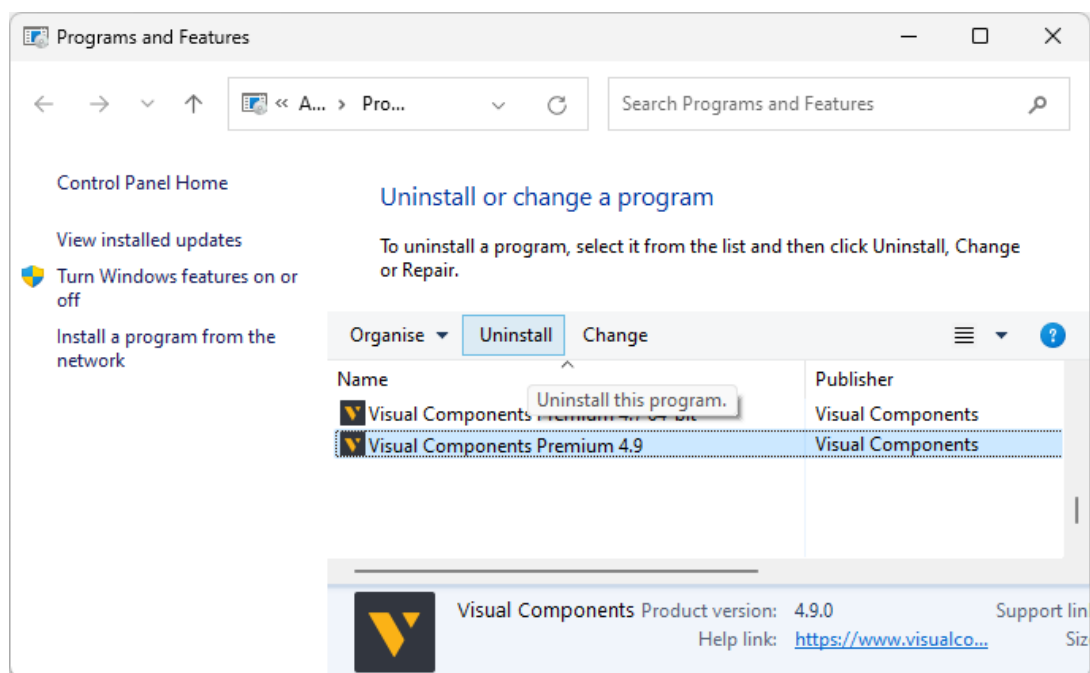

4. On the **Setup Wizard** dialog, click **Finish**.

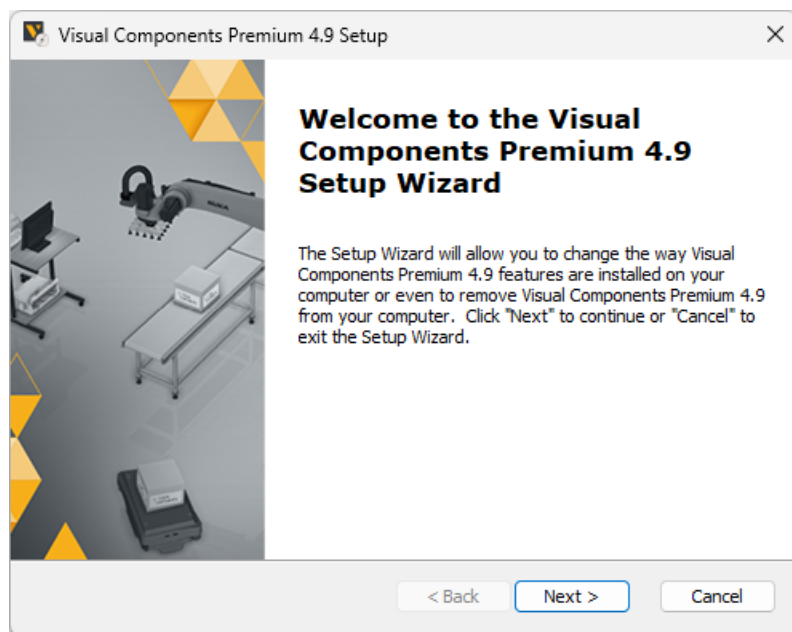

Uninstall

1. In the **Uninstall or change a program** panel, select the Visual Components product you wish to remove, then click **Uninstall**.

2. On the **Setup Wizard** dialog, click **Next**.

3. On the **Remove Visual Components** dialog, you may select the following options:

- Select **Deactivate License** to deactivate any license keys for this product, that are currently active on your device.

Note: We recommend deactivation of a product license key during uninstallation, to avoid possible future issues, when re-installing the software on a different computer.

- Select **Remove configuration and log files** to remove these files from the following example directory:

C:\Users\UserName\AppData\Local\Visual Components\Visual Components Premium 4.9

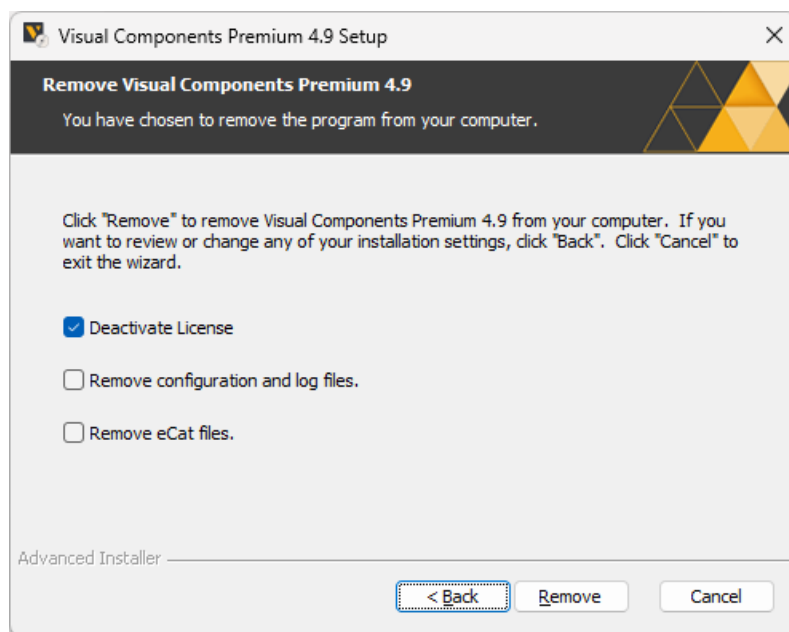

- Select **Remove eCat files** to remove eCatalog files from the following directory:

C:\Users\Public\Documents\Visual Components\4.9\Models

Note: This process does not affect any data in your *My Models* folder. For example in the following directory:

C:\Users\UserName\Documents\Visual Components\4.9

Then click **Remove**.

4. On the **Setup Wizard** dialog, click **Finish**.

Licensing

The first time you run a Visual Components application, you will be prompted to provide either a standalone software license key, or the address to a Visual Components Network License Server. Refer to the [Commercial License section](#) for more information.

Note: Your computer and network must allow traffic from Visual Components software, so you may need to modify your firewall settings. For more information, refer to the [Frequently Asked Questions](#) section.

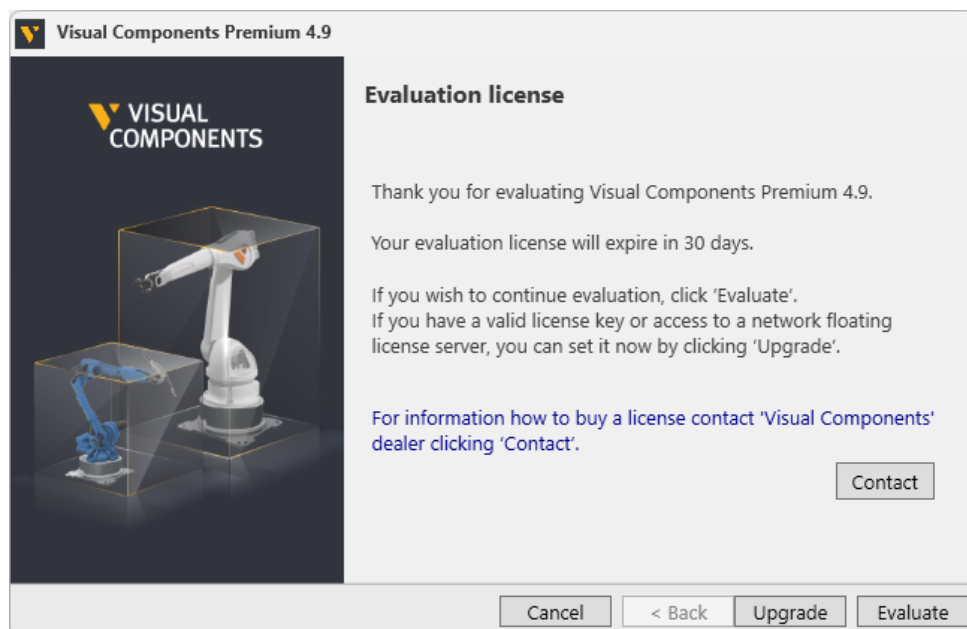

Evaluation license

Evaluation licenses are software license keys with a specific number of activation days. Once activated on a standalone computer system, they cannot be deactivated, nor can they be transferred to another system.

Activation of the evaluation license, will expire automatically after the specified number of activation days. After the evaluation period, the user is required to purchase a [Commercial License](#) to continue using the Visual Components product.

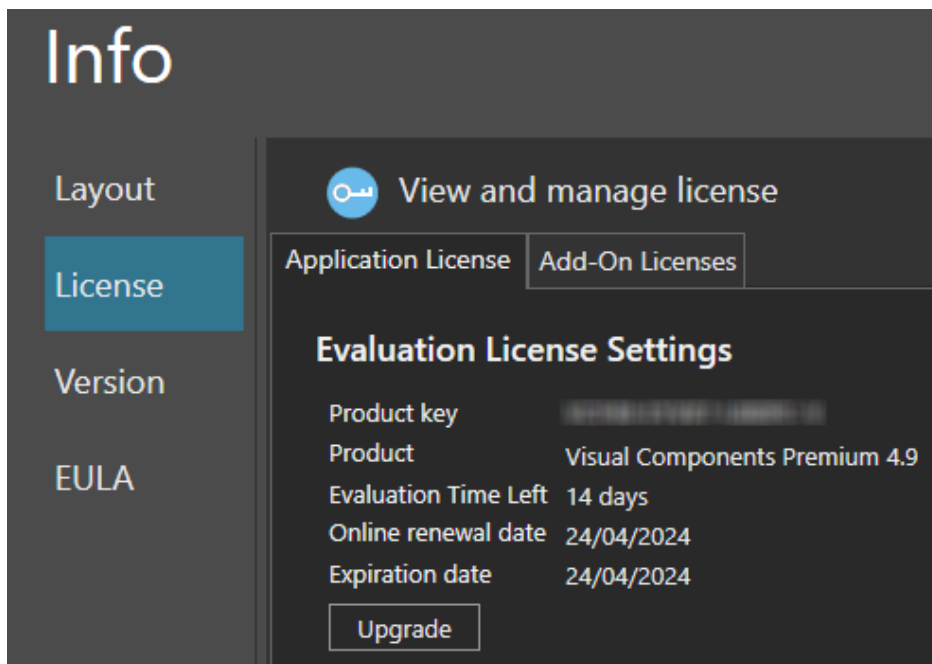

1. To start your evaluation period, visit the [downloads page](#) to download the installer for your product and version. Then install your Visual Components application and activate your evaluation license key.
2. When starting your application, from the **Evaluation License** dialog, you can either choose **Upgrade**, or choose **Evaluate** to continue to use the software within the evaluation period.

Note: You can use this dialog to track how many days remain of your evaluation period.

3. To upgrade during the evaluation period, select the **FILE** tab to access the Backstage view, then select **Info** and **License**.

4. And from the Application License tab click Upgrade.

Commercial license

A commercial license, is either a time limited or perpetual license key, that can be found in your shipping note.

Commercial License key types

License keys are available for the following Visual Components products:

- Visual Components Premium
- Visual Components Professional
- Visual Components Essentials
- Visual Components Premium OLP
- Visual Components Professional OLP
- Visual Components Robotics OLP

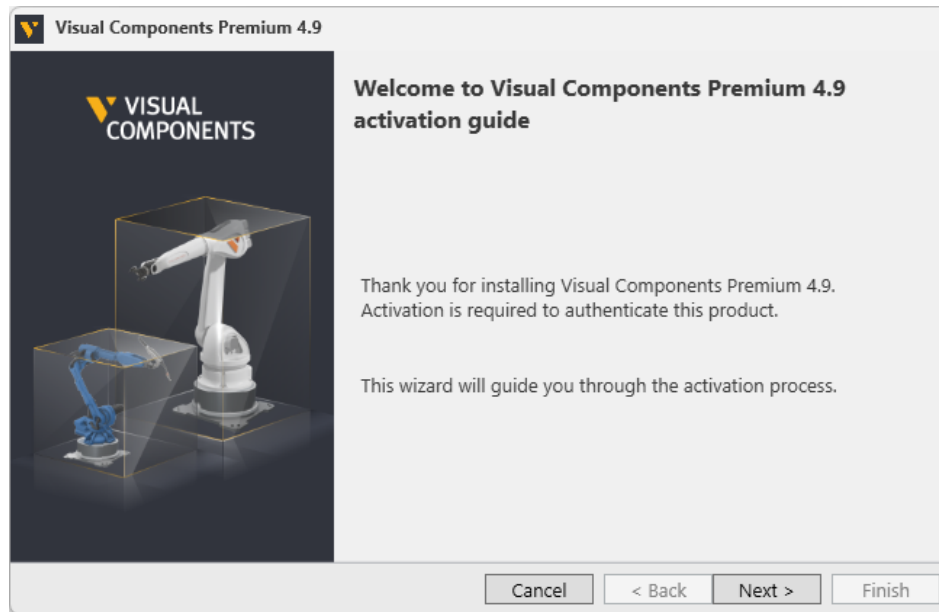

Note: Any references to “Robotics OLP” in this user guide, refers to all three OLP products listed above, as part of the Visual Components Robotics OLP family of products.

Standalone product key

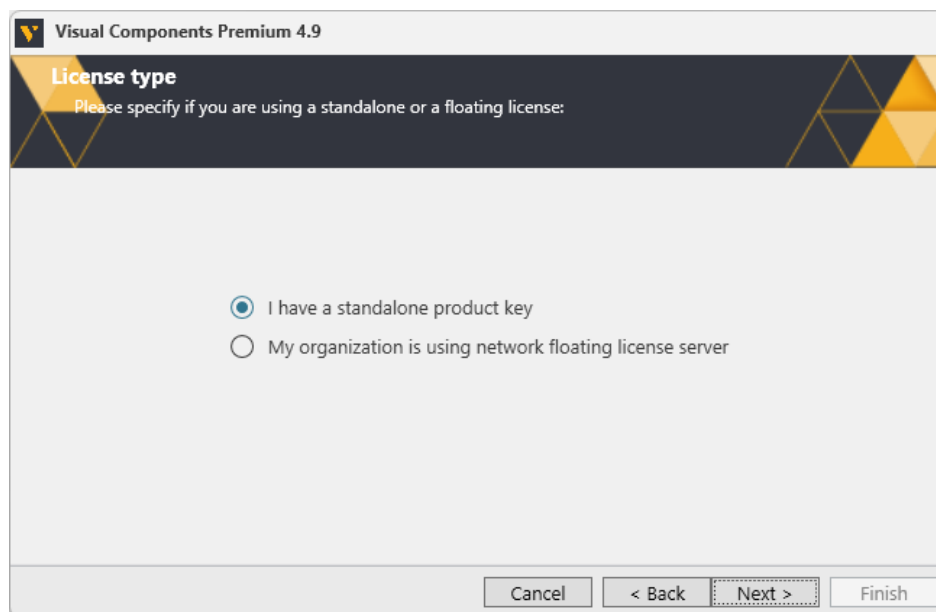

Online Activation

To use your commercial product key to activate a Visual Components product, follow these steps:

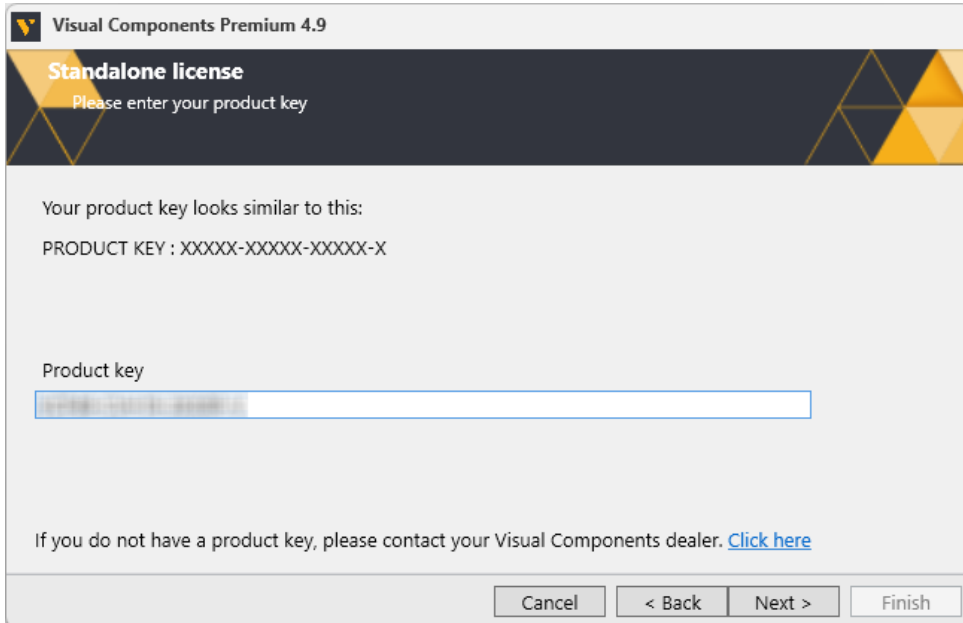

1. Run your Visual Components application.
2. On the **Welcome** dialog, click **Next**.

3. On the **License type** dialog, select **I have a standalone product key**, and then click Next.

- On the **Standalone license** dialog, enter your 16-digit product key, and then click **Next**.
Note: If you have a license key that includes Robotics OLP, some features will be available to enable in the Backstage view. Refer to the [Enable Robotics OLP](#) section for more information.

Visual Components Premium 4.9

Standalone license

Please enter your product key

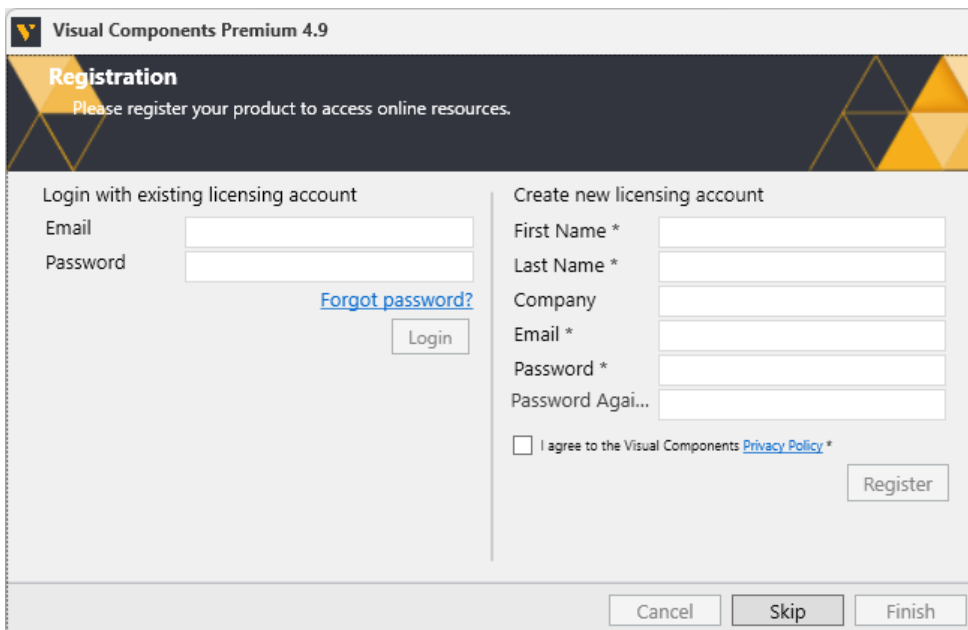

Your product key looks similar to this:
PRODUCT KEY : XXXXX-XXXXX-XXXXX-X

Product key

If you do not have a product key, please contact your Visual Components dealer. [Click here](#)

Cancel < Back Next > Finish

- If there is an error or issue with the license, contact Visual Components licensing support via email at licensing@visualcomponents.com.
- Following product activation, use the **Registration** dialog to create a licensing account using an email address and password. Or you can select **Skip** and register an account later, using the steps outlined in the [Register Product Key](#) section.

Visual Components Premium 4.9

NOTE! Registration requires an active Internet connection and the password you create must be at least eight characters in length, and include the following:

- At least one lower case letter.
 - At least one upper case letter.
 - At least one special character.
 - At least one number.
7. Once you have registered your product, you can use the account to manage your software licenses online in the Customer Portal at license.visualcomponents.net, and request Customer Support at support.visualcomponents.com.
 8. Click **Finish** to complete licensing.

Robotics Solver Add-on Activation

To activate a Visual Components Robotics Solver Add-on license key, you should also have a license key for one of the following products:

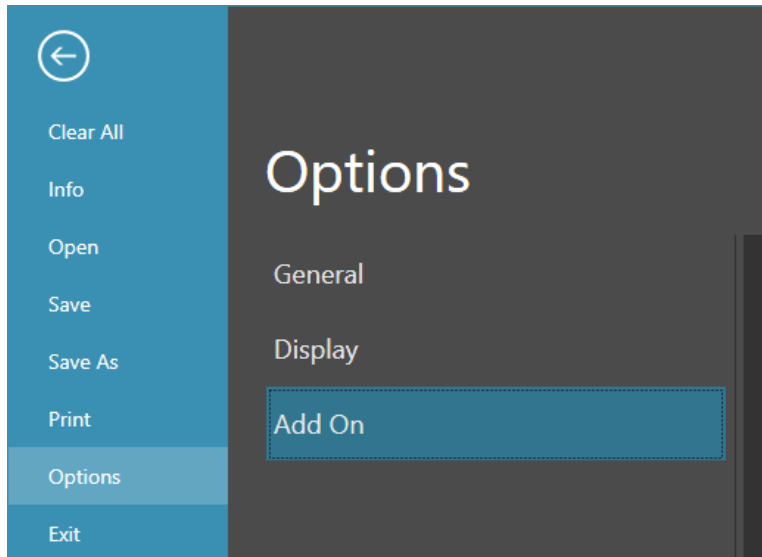

- Visual Components Premium OLP
- Visual Components Professional OLP
- Visual Components Robotics OLP

Note: A Robotics OLP product will enable OLP features in the **PROGRAM** and **PAINT** tabs, including the **Path Check** Panel. Activating the additional Robotics Solver Add-on License enables three buttons in the **Path Check** Panel, and some additional settings that are only available when using the Robotics Solver Add-on.

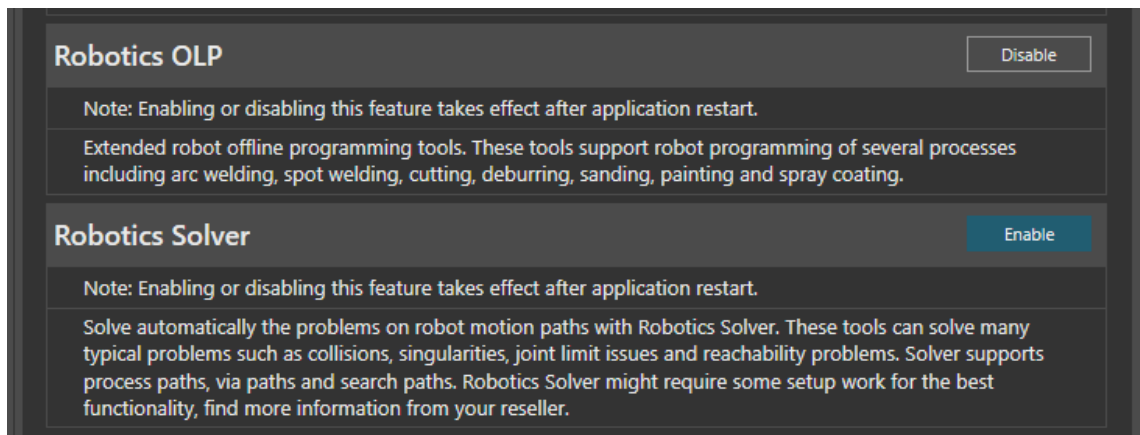

To activate the Robotics Solver Add-on follow these steps:

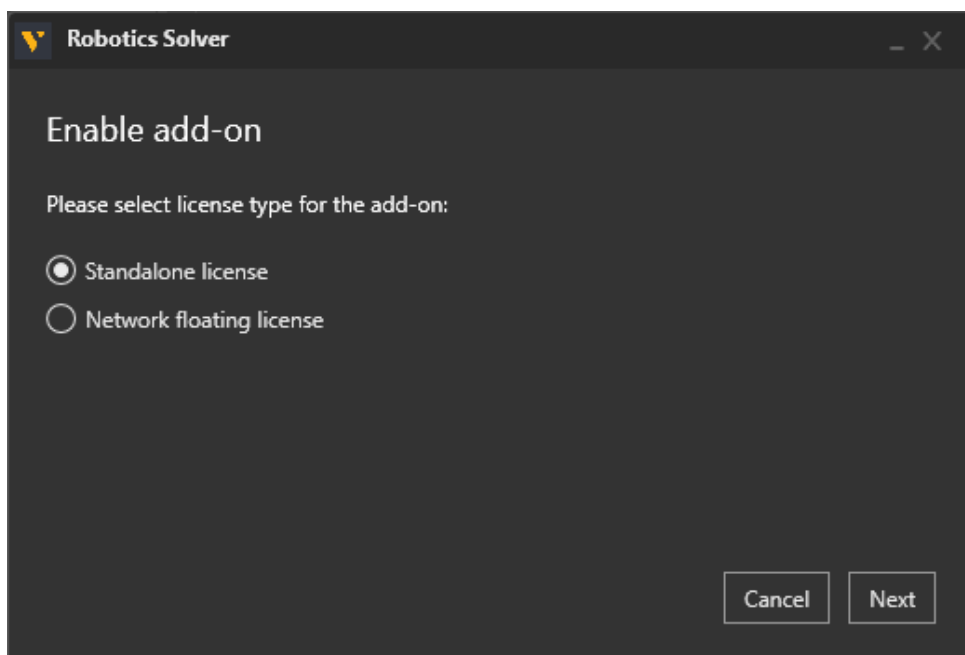

1. Start your Visual Components Robotics OLP application.
2. Select the **FILE** tab to access the Backstage view, then select **Options** and **Add On**.

3. From the View and manage Add-ons section for Robotics Solver click Enable.

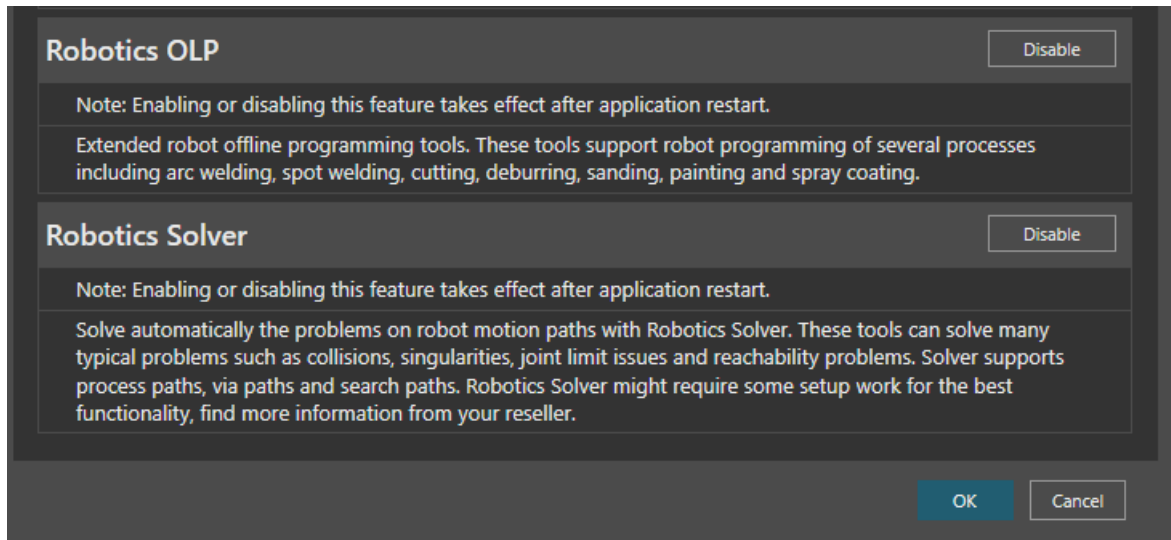

4. On the **Robotics Solver** panel, select your license type **Standalone license**, and then click **Next**.

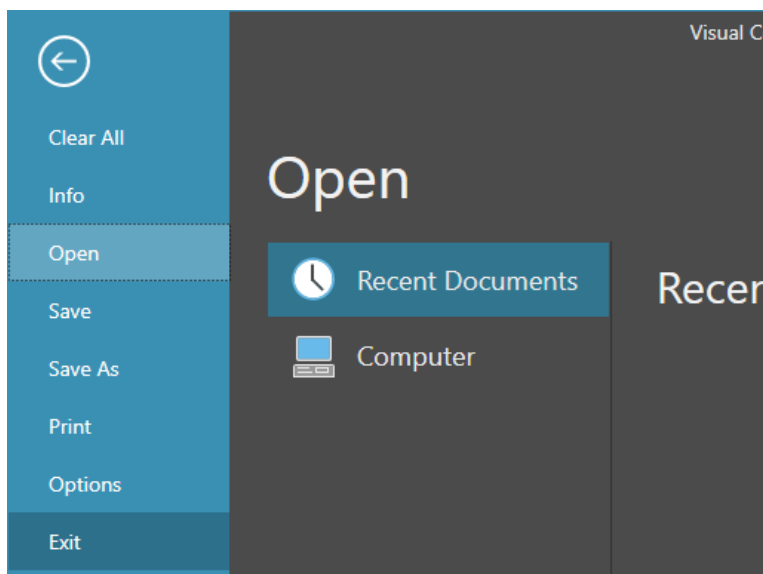

5. Then enter your Robotics Solver Add-on License key and click **Activate**.

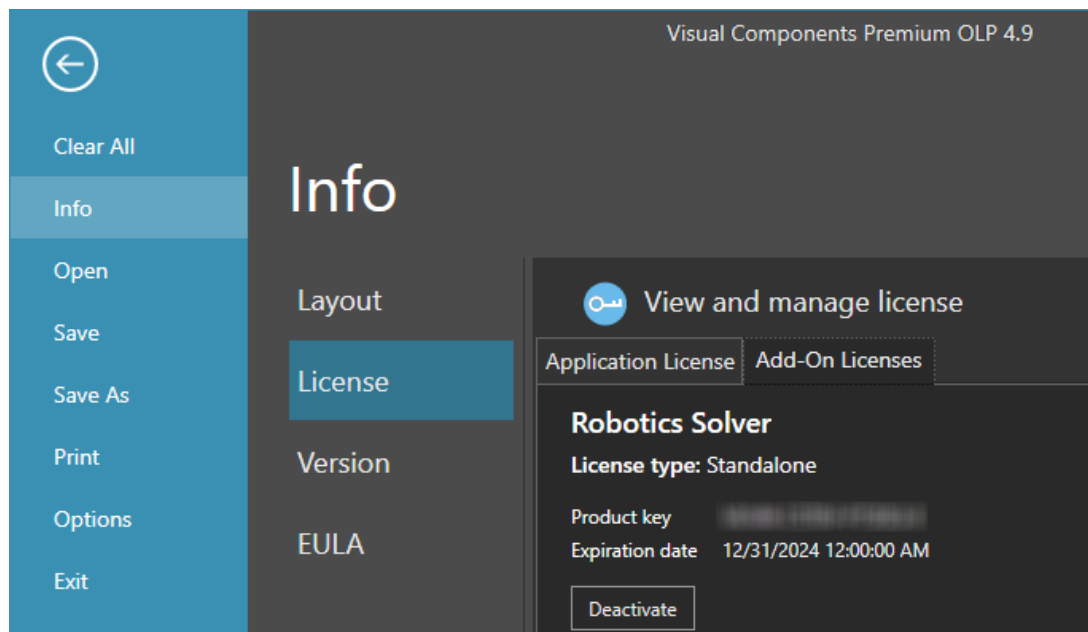

6. Once the Robotics Solver Add-on has been enabled, the status will change to **Disable**, and you will need to restart the application.

7. Then select the **FILE** tab to access the Backstage view and use **Exit** to close the application and restart.

8. To check the status of your Robotics Solver Add-on license, use the **FILE** tab to access the Backstage view, then select **Info** and **License** and the **Add-On Licenses** tab.

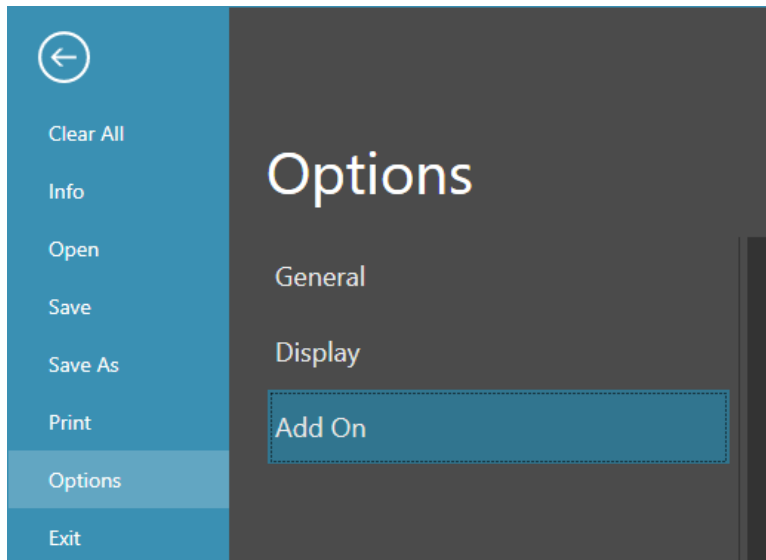

Note: Should you ever need to transfer your software licenses to another Visual Components Customer Account, any add-on Licenses you have activated will also be transferred. For more information refer to the [Updating Registration Information](#) section.

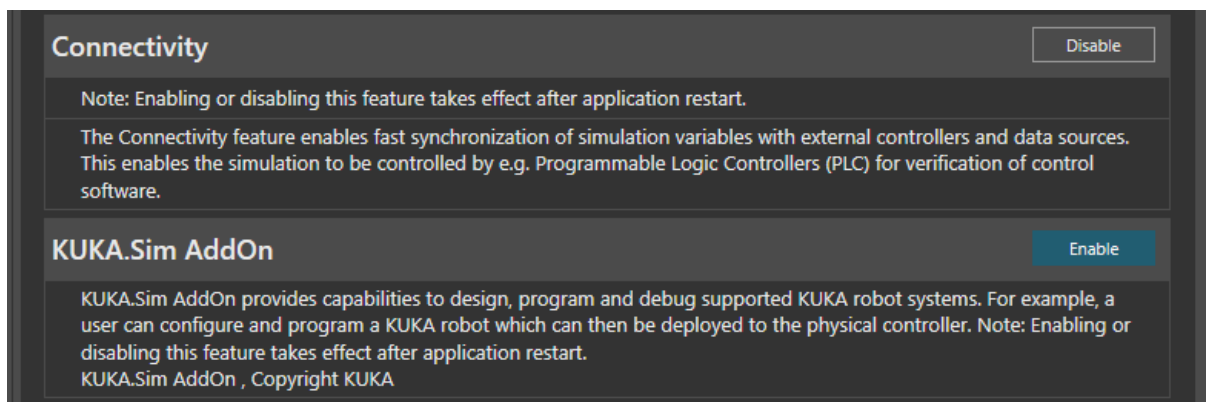

KUKA.Sim AddOn Activation

The KUKA.Sim AddOn is available for users of Visual Components Premium and Premium OLP. To activate the add-on follow these steps:

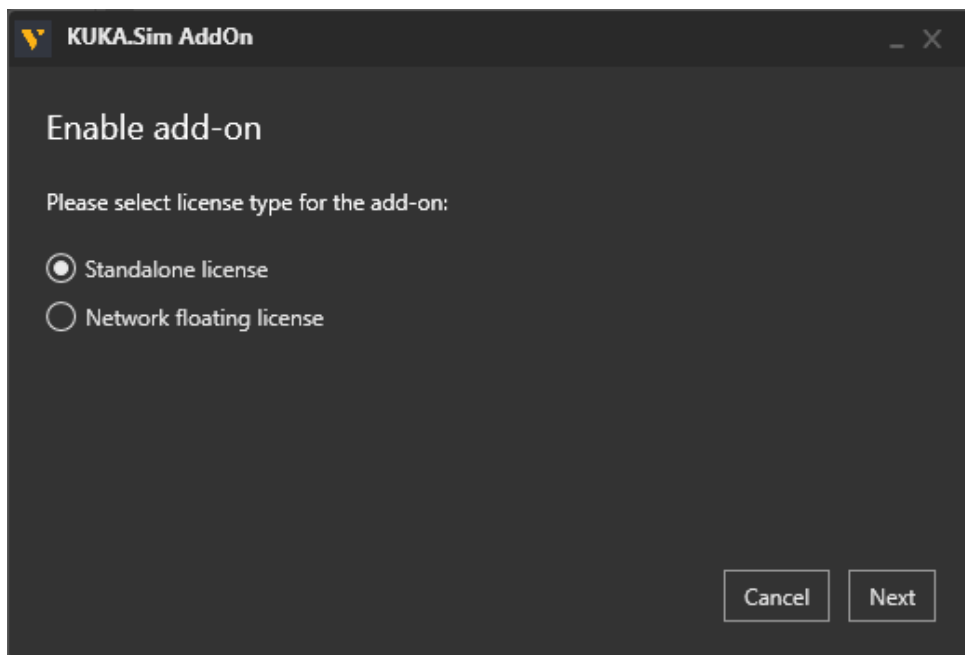

1. Start your Visual Components application.
2. Select the **FILE** tab to access the Backstage view, then select **Options** and **Add On**.

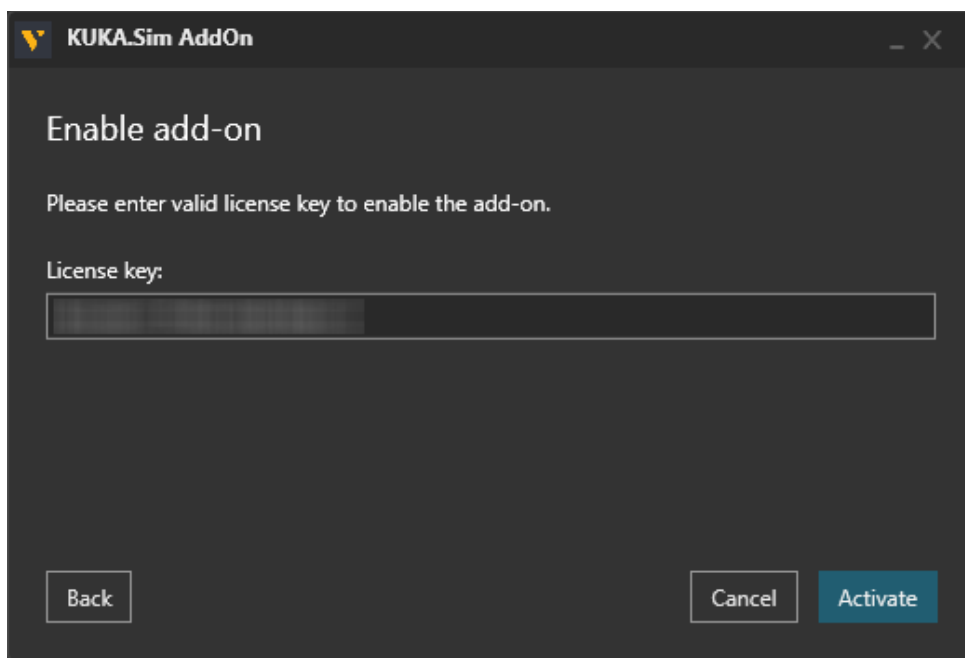

3. From the View and manage Add-Ons section for KUKA.Sim AddOn click Enable.

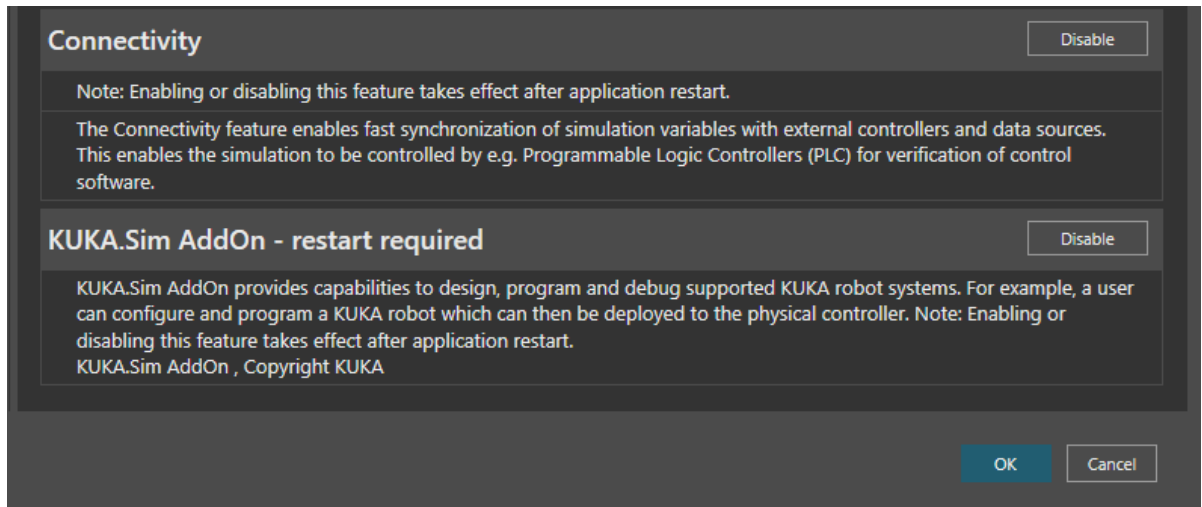

4. On the **KUKA.Sim AddOn** panel, select your license type **Standalone license**, and then click **Next**.

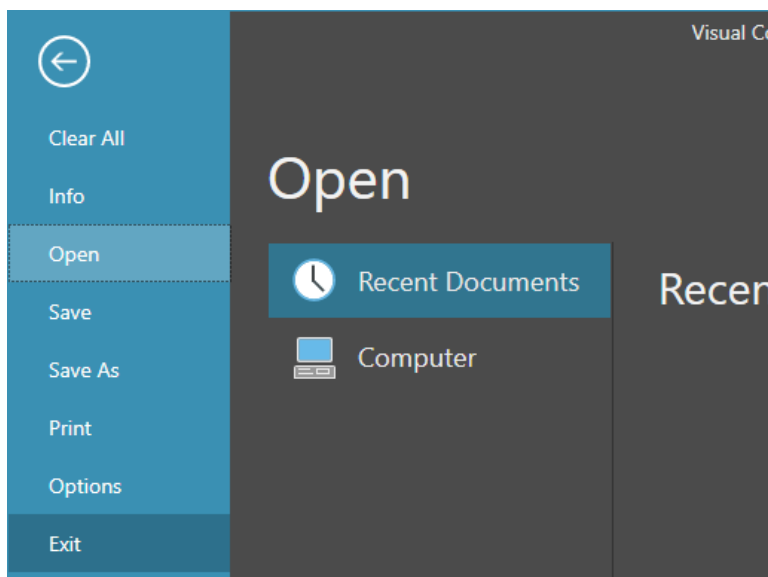

5. Then enter your **KUKA.Sim AddOn** License key and click **Activate**.

6. Once the **KUKA.Sim AddOn** has been enabled, the status will change to **KUKA.Sim AddOn – restart required**, so then click **OK** below.

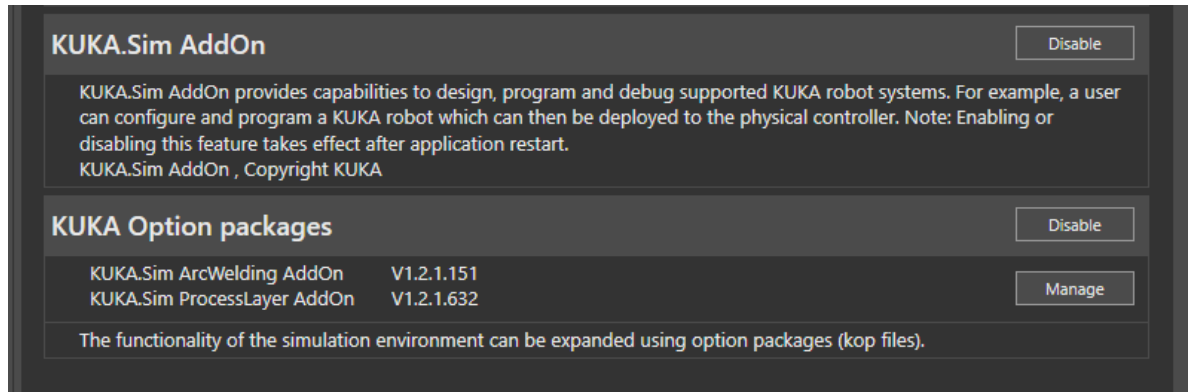

7. Then select the **FILE** tab to access the Backstage view and use **Exit** to close the application and restart.

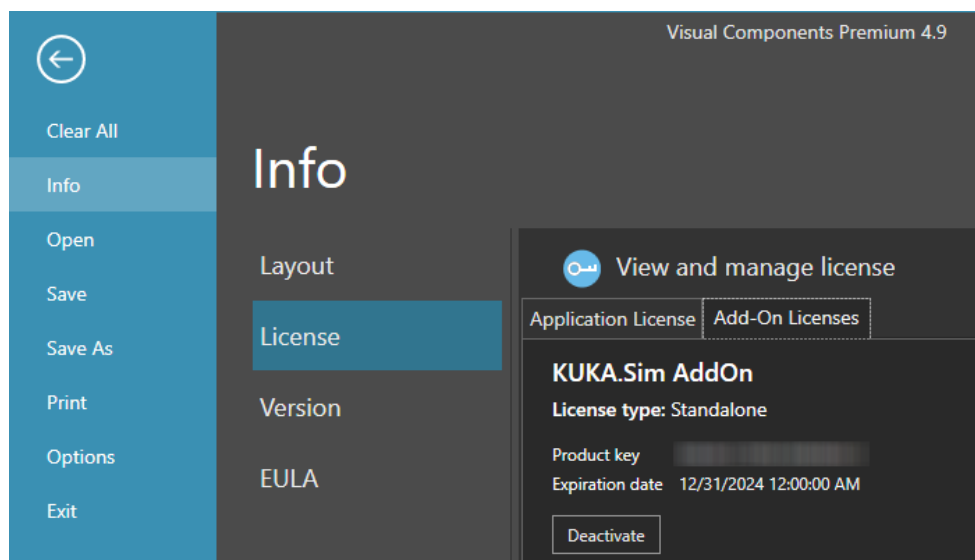

8. Then restart the application and your **KUKA.Sim AddOn** will be enabled.

Note: To manage the add-on, use the **FILE** tab to access the Backstage view, then select **Options** and **Add On**. And under **View and manage Add-Ons**, refer to the **KUKA.Sim AddOn** sections.

9. To check the status of your KUKA.Sim AddOn license, use the **FILE** tab to access the Backstage view, then select **Info** and **License** and the **Add-On Licenses** tab.

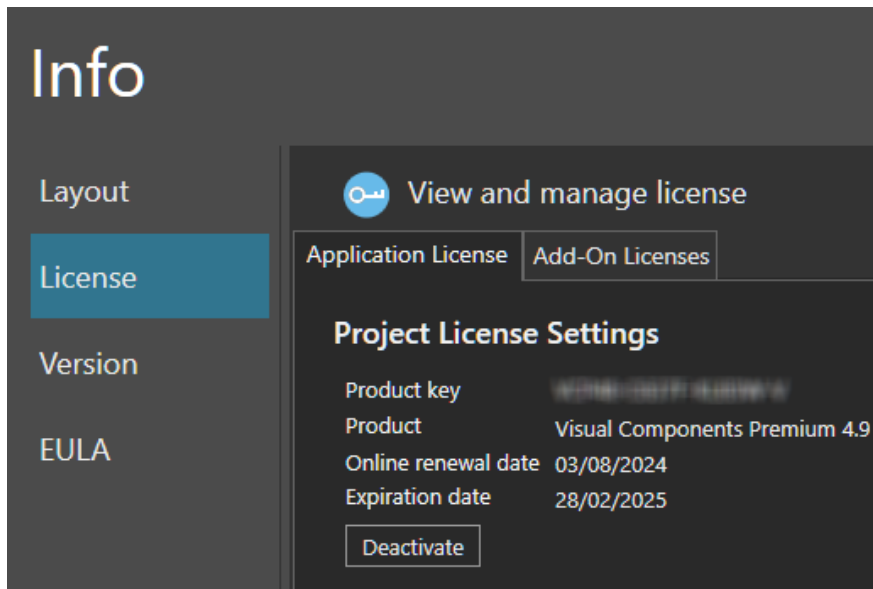

NOTE: Should you ever need to transfer your software licenses to another Visual Components Customer Account, any add-on Licenses you have activated will also be transferred. For more information refer to the [Updating Registration Information](#) section.

Register Product Key

If you skipped the product Registration option while activating your software license key, you can register using the following options:

1. Select the **FILE** tab to access the Backstage view, then select **Info** and **License**. And under **Registration Information** click **Register**.

2. You can then Register by either selecting **Yes, I have an account** and signing in using the email and password for an existing account. Or create a new account by choosing **No, create one for me now**.

The image shows a registration dialog box with a dark background. The title is 'Have you registered a product before?'. There are two radio button options. The first option is 'Yes, I have an account', which is selected. Below this option are two input fields labeled 'Email *' and 'Password'. To the right of these fields is a 'Login' button. The second option is 'No, create one for me now', which is not selected. At the bottom right of the dialog is a 'Cancel' button.

3. And to create a new account complete the registration form.

Note: The password you create must be at least eight characters in length, and include the following:

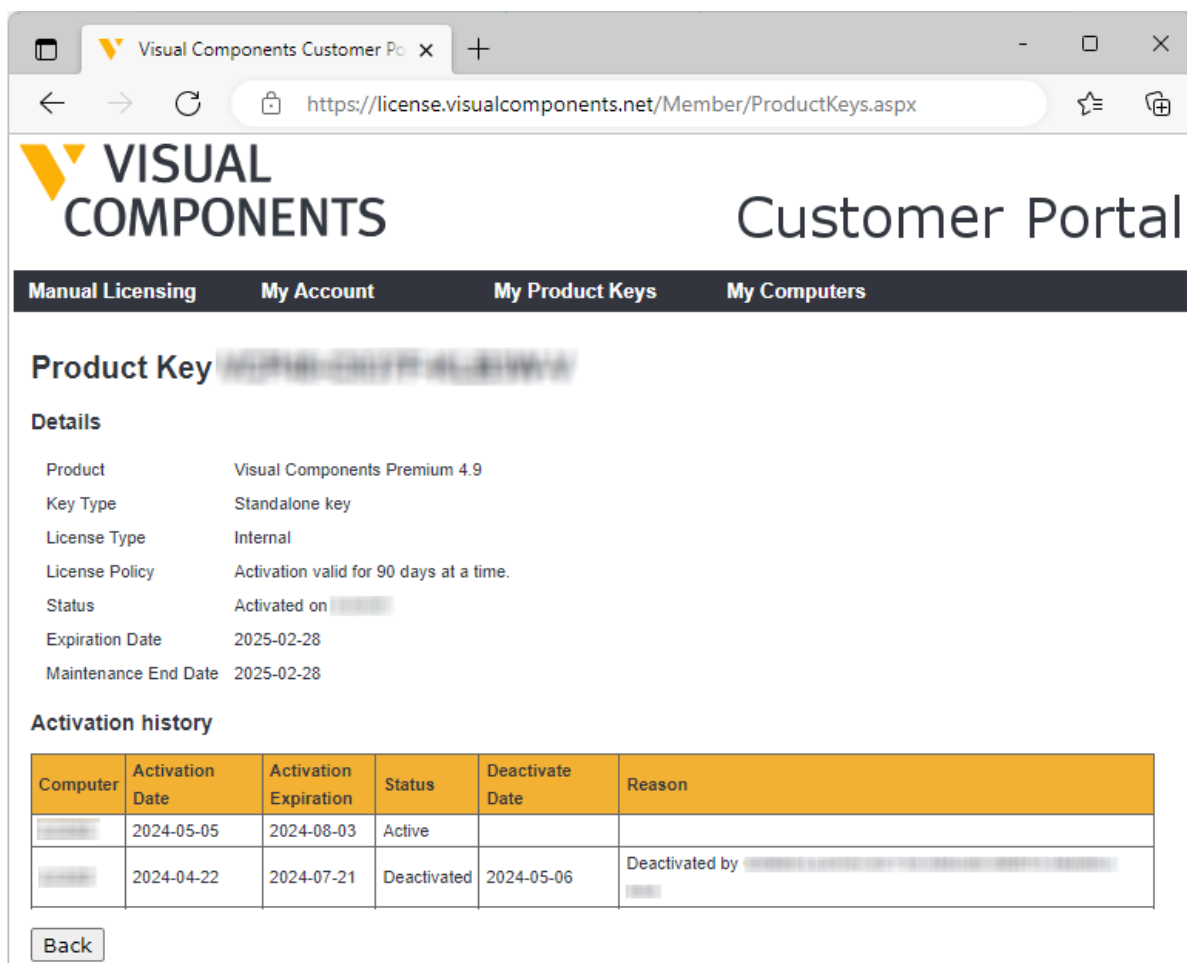

- At least one lower case letter.
- At least one upper case letter.
- At least one special character.
- At least one number.

The registration form is titled "Have you registered a product before?". It has two radio button options: "Yes, I have an account" and "No, create one for me now". The "No, create one for me now" option is selected. Below the options are input fields for "First Name *", "Last Name *", "Company", "Email *", "Password *", and "Password Again *". At the bottom, there is a checkbox for "I agree to the Visual Components Privacy Policy *" and two buttons: "Register" and "Cancel".

4. Then once your account has been added, your account details will appear under **Registration Information** in the **License** section of the Backstage view.

The Backstage view shows the "License" section. The left sidebar has "Layout", "License" (highlighted), "Version", and "EULA". The main content area is titled "View and manage license" and has two tabs: "Application License" and "Add-On Licenses". Under "Application License", there is a "Project License Settings" section with fields for "Product key", "Product" (Visual Components Premium 4.9), "Online renewal date" (03/08/2024), and "Expiration date" (28/02/2025). Below these is a "Deactivate" button. The "Registration Information" section shows "This product is registered to" with fields for "Email", "Name", "Company" (Visual Components), and "Password".

5. Once the product key has been registered, you can check the activation history of your software license keys online in the Customer Portal at license.visualcomponents.net.

The screenshot shows the Visual Components Customer Portal interface. The browser address bar displays <https://license.visualcomponents.net/Member/ProductKeys.aspx>. The page header includes the Visual Components logo and the text "Customer Portal". A navigation bar contains links for "Manual Licensing", "My Account", "My Product Keys", and "My Computers". The main content area is titled "Product Key" and displays a blurred product key. Below this, the "Details" section lists the following information:

Product	Visual Components Premium 4.9
Key Type	Standalone key
License Type	Internal
License Policy	Activation valid for 90 days at a time.
Status	Activated on [blurred]
Expiration Date	2025-02-28
Maintenance End Date	2025-02-28

Below the details is the "Activation history" section, which contains a table with the following data:

Computer	Activation Date	Activation Expiration	Status	Deactivate Date	Reason
[blurred]	2024-05-05	2024-08-03	Active		
[blurred]	2024-04-22	2024-07-21	Deactivated	2024-05-06	Deactivated by [blurred]

A "Back" button is located at the bottom left of the activation history section.

NOTE: Network License keys are not visible through the Customer Portal.

Updating Registration Information

Should you ever need to update your registered user information or transfer your product licenses to another account, visit the **Registration Information** section, enter your account password, and click **Change registration**.

And then use either the **Transfer to another account** or **Update current user information** options.

The screenshot shows a web interface titled "View and manage license" with a blue icon. It has two tabs: "Application License" (selected) and "Add-On Licenses".

Project License Settings

Product key	Visual Components Premium 4.9
Product	Visual Components Premium 4.9
Online renewal date	03/08/2024
Expiration date	28/02/2025

Registration Information

This product is registered to

☐ Update current user information

NOTE: Transferring your product licenses will also include any currently activated add-On Licenses e.g. KUKA OLP AddOn.

Offline Manual Activation

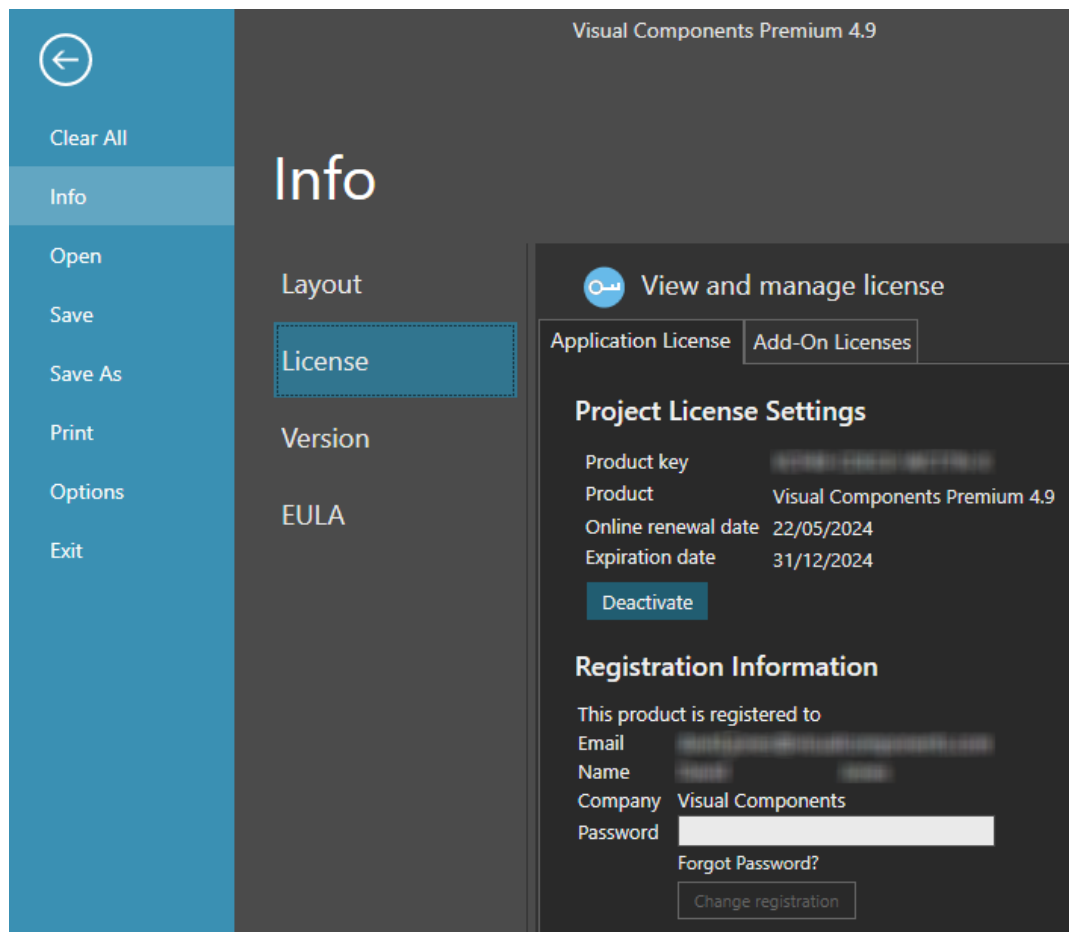

For detailed information on how to manually activate your copy of Visual Components, please use this link [Manually Activate a Standalone License](#) to view a detailed video guide on the Visual Components Academy.

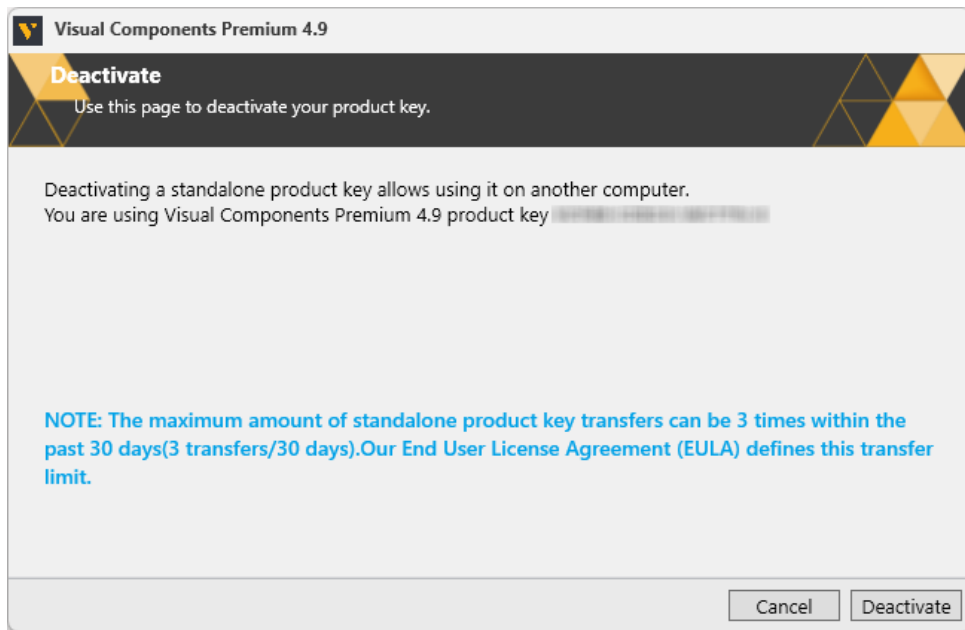

Online Deactivation

You can deactivate a standalone license for use on a different machine. For more information, refer to the [Deactivation limit/Transfer limit](#) section below.

1. Select the **FILE** tab to access the Backstage view, then select **Info** and **License**. And under **Project License Settings** click **Deactivate**.

2. In the **Deactivate** dialog, click **Deactivate**.

3. If your license was successfully deactivated, on the **Deactivation status** dialog, do one of the following:

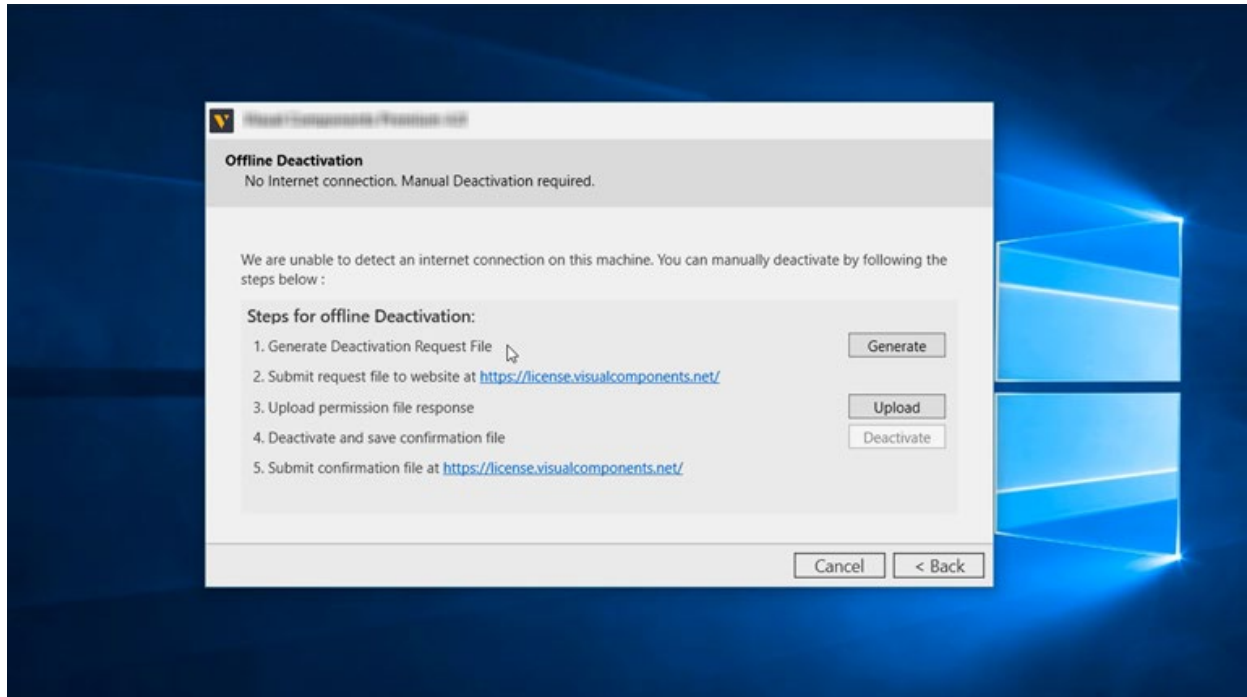

- To complete deactivation, click **Close**.
- To configure a new license, click **Configure**.

4. To configure a new license refer to the **Online Activation** section of this document.

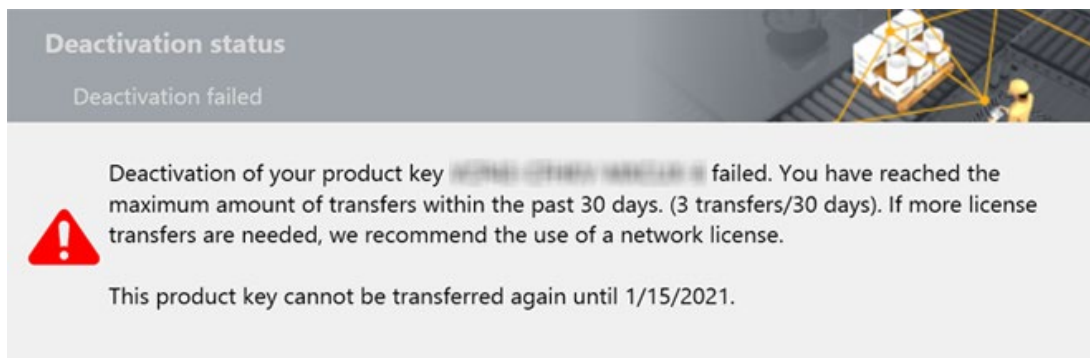

Offline Manual Deactivation

For detailed information on how to manually deactivate your copy of Visual Components, please use this link [Manually Deactivate a Standalone License](#) to view a detailed video guide on the Visual Components Academy.

Deactivation limit/Transfer limit

A perpetual standalone software license key can be activated and deactivated up to 3 times during a 30-day period. This transfer limit is defined in our End User License Agreement (EULA). Once this limit is reached, the date on which the next transfer is possible will be displayed in an error message.

If there is a requirement to transfer a key more than 3 times in a month, you will need to upgrade to a Network License. Contact your Sales Representative to upgrade from a standalone to a Network License Key.

If you have Registered your product key, you can check the activation history of your software licenses online in the Customer Portal at license.visualcomponents.net.

1. To view the activation history of an individual license, from the **My Product Keys** page click on the **Product Key** link.

Search results

Product key	Product	Type	Status
XXXXXXXX-NTXXXX-N	Visual Components Premium 4.9	Standalone key	Activated on XXXXXX

Copyright 2022 by Visual Components Oy | [Privacy Policy](#) | www.visualcomponents.com

2. Then in the **Details** page for that specific **Product Key**, you can examine its **Activation history**.

The screenshot shows the Visual Components Customer Portal interface. The top navigation bar includes links for Manual Licensing, My Account, My Product Keys, and My Computers. The main content area displays the details for a specific Product Key. The details section lists the Product (Visual Components Premium 4.9), Key Type (Standalone key), License Type (Internal), License Policy (Activation valid for 90 days at a time), Status (Activated on XXXXXX), Expiration Date (2025-02-28), and Maintenance End Date (2025-02-28). Below the details is the Activation history section, which contains a table with columns for Computer, Activation Date, Activation Expiration, Status, Deactivate Date, and Reason. The table shows two entries: one active on 2024-05-05 and one deactivated on 2024-05-06. A Back button is located at the bottom left of the activation history section.

Product Key XXXXXXXX-NTXXXX-N

Details

Product: Visual Components Premium 4.9
Key Type: Standalone key
License Type: Internal
License Policy: Activation valid for 90 days at a time.
Status: Activated on XXXXXX
Expiration Date: 2025-02-28
Maintenance End Date: 2025-02-28

Activation history

Computer	Activation Date	Activation Expiration	Status	Deactivate Date	Reason

XXXXXXXX	2024-04-22	2024-07-21	Deactivated	2024-05-06	Deactivated by XXXXXXXX-NTXXXX-N

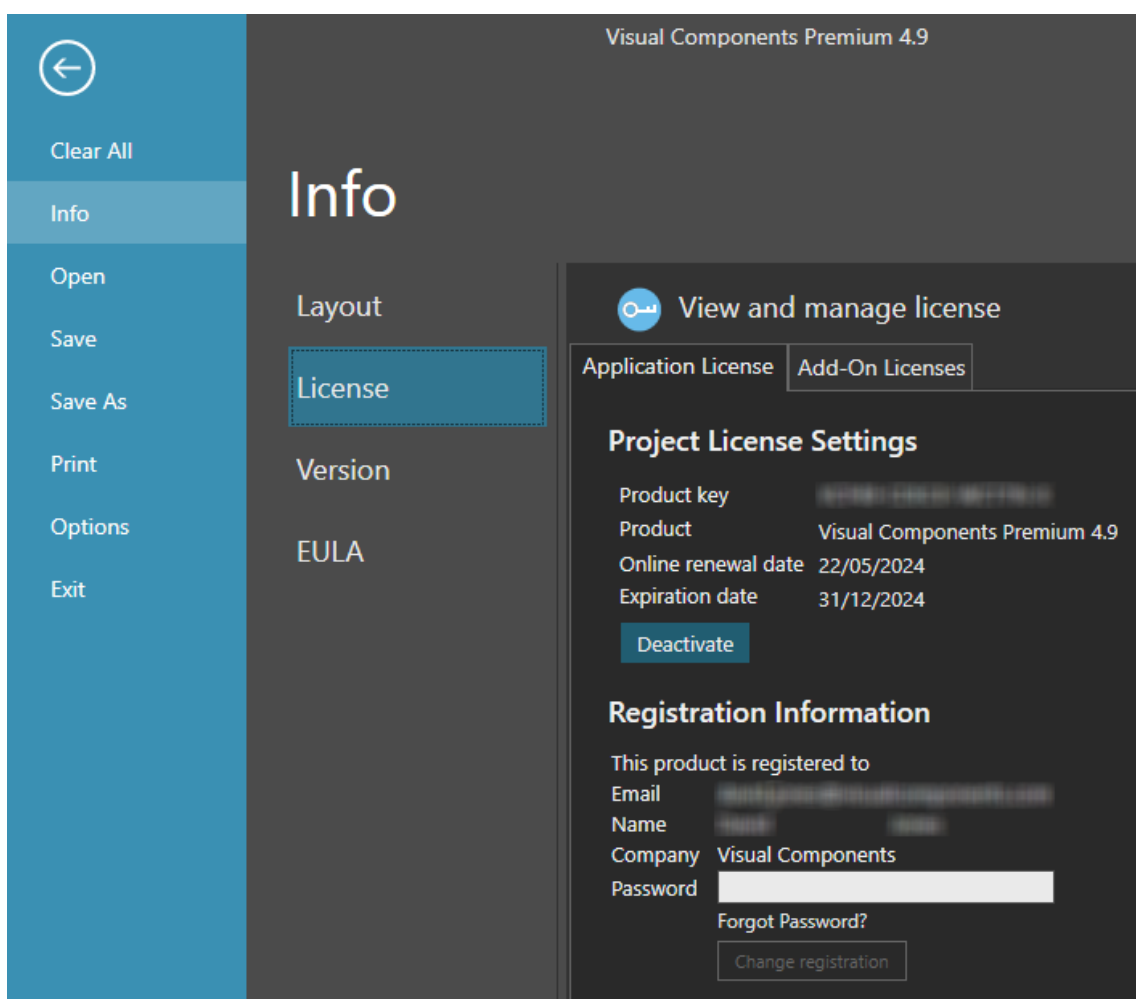

[Back](#)

Note: Network License keys are not visible through the Customer Portal.

Activation renewal

- A standalone license is activated for example, for 90 days.
- Upon expiration of the current activation period, the product key will attempt to automatically re-activate when you launch the application.
- This requires your computer to be connected to the internet.
- If online renewal fails, you will receive a notification that asks you to renew the license manually.

To view the renewal date of your active License, select the **FILE** tab to access the Backstage view, then select **Info** and **License**. And under **Project License Settings** refer to the **Online renewal date**.

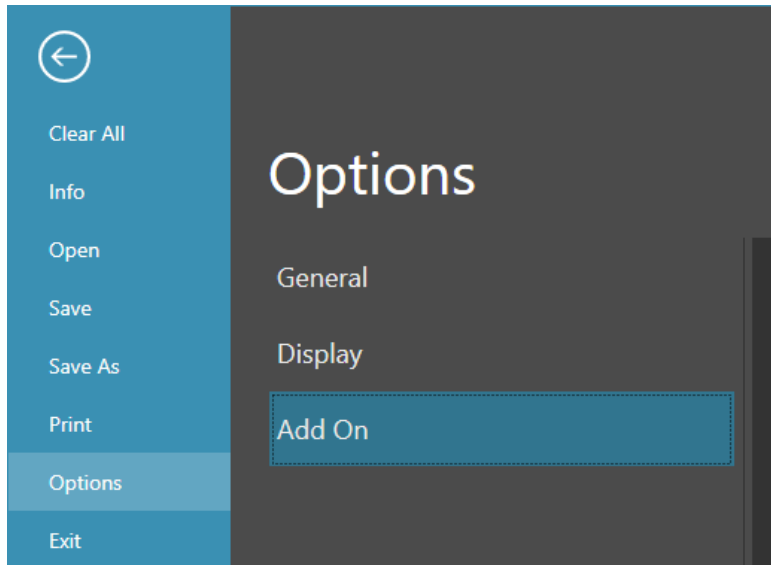

Managing Add-ons

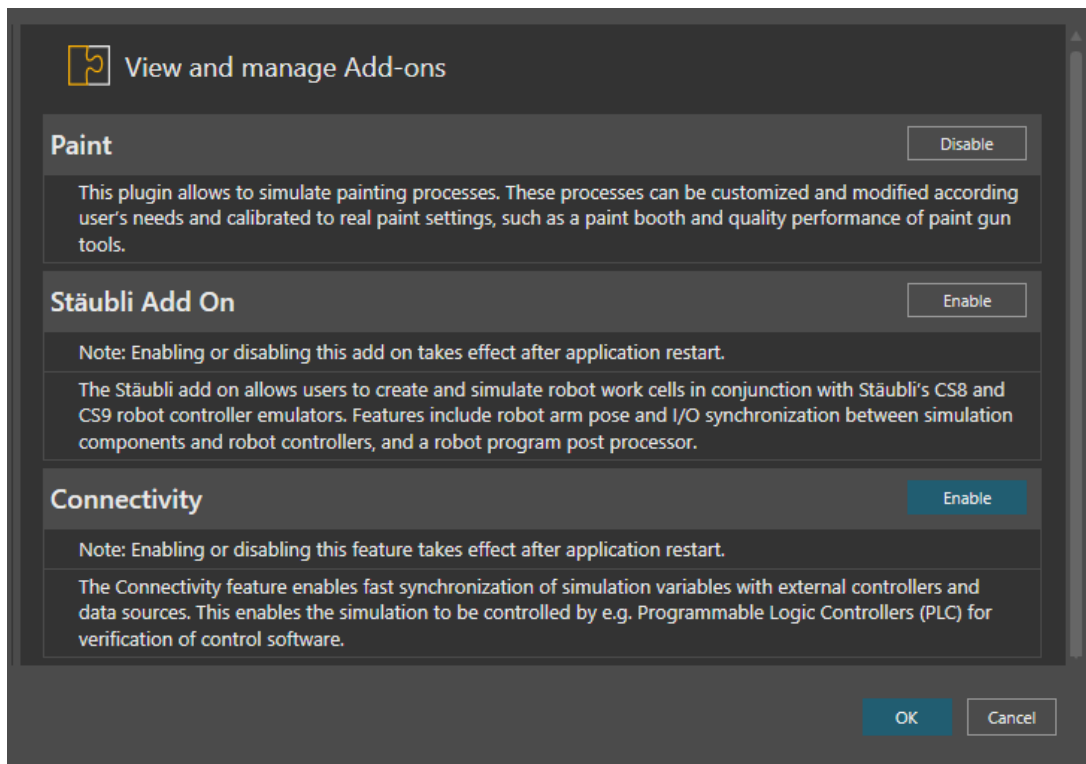

It is possible to enable and disable the list of available add-ons.

Note: In this example, we will enable the **CONNECTIVITY** tab. The list of available add-ons may vary per Visual Components product.

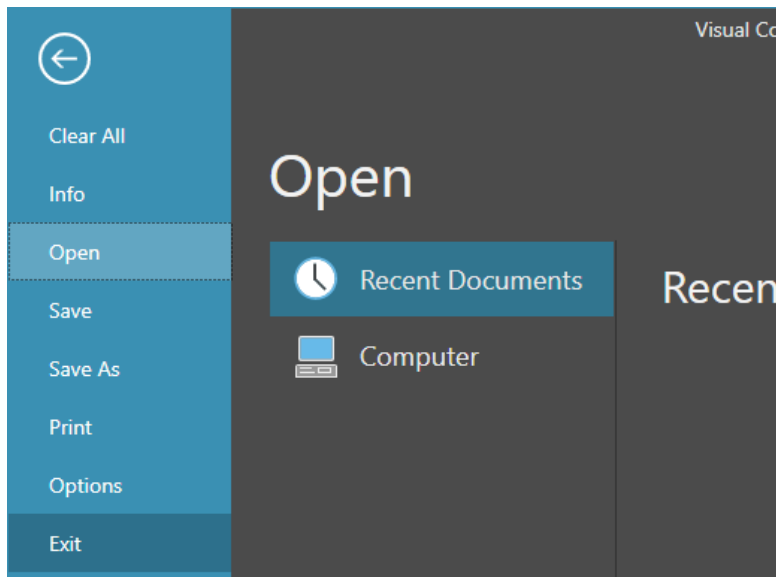

1. Select the **FILE** tab to access the Backstage view, then select **Options** and **Add On**.

2. From the **View and manage Add-Ons** section for **Connectivity**, click **Enable**, then click **OK**.

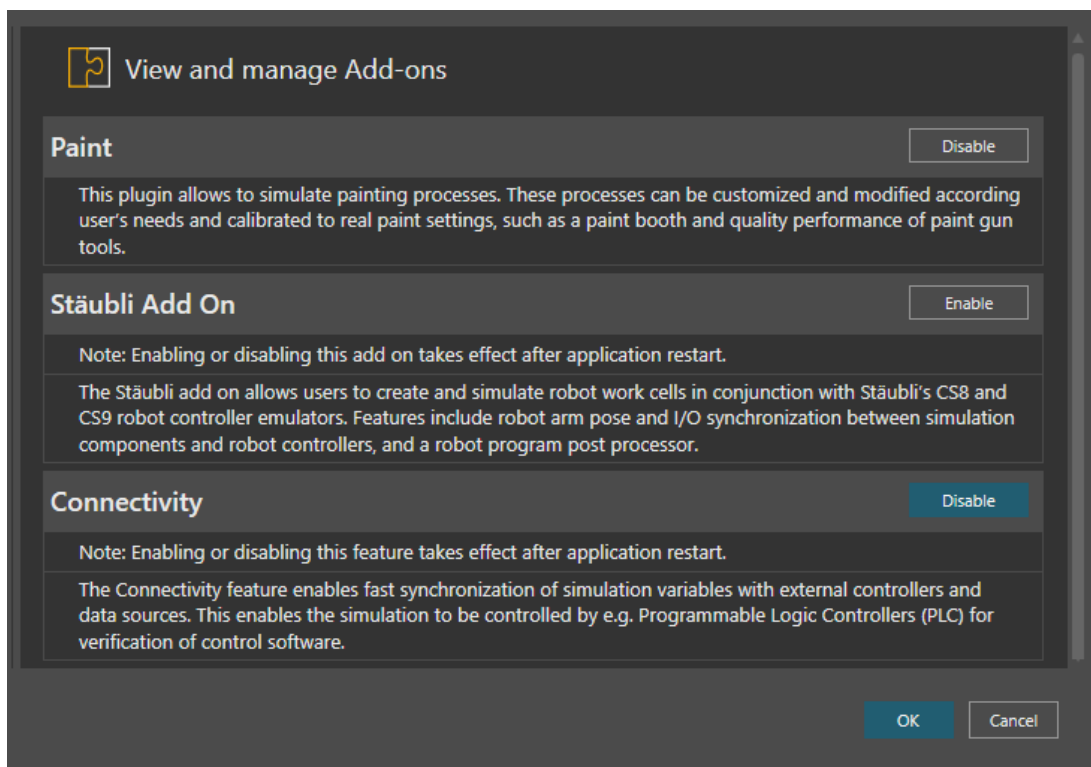

3. Then select the **FILE** tab to access the Backstage view, and use **Exit** to close the application.

4. Then restart the application, and the **Connectivity** tab should now be available.

5. To disable the **Connectivity** tab, repeat the process and choose **Disable**.

Network License

Management of Network License keys for Visual Components, is managed by the Visual Components License Server Management Console, that is installed on a centralized server PC inside an organization's network. And a client PC needs to be inside the same network, to access a Visual Components product using a Network License key.

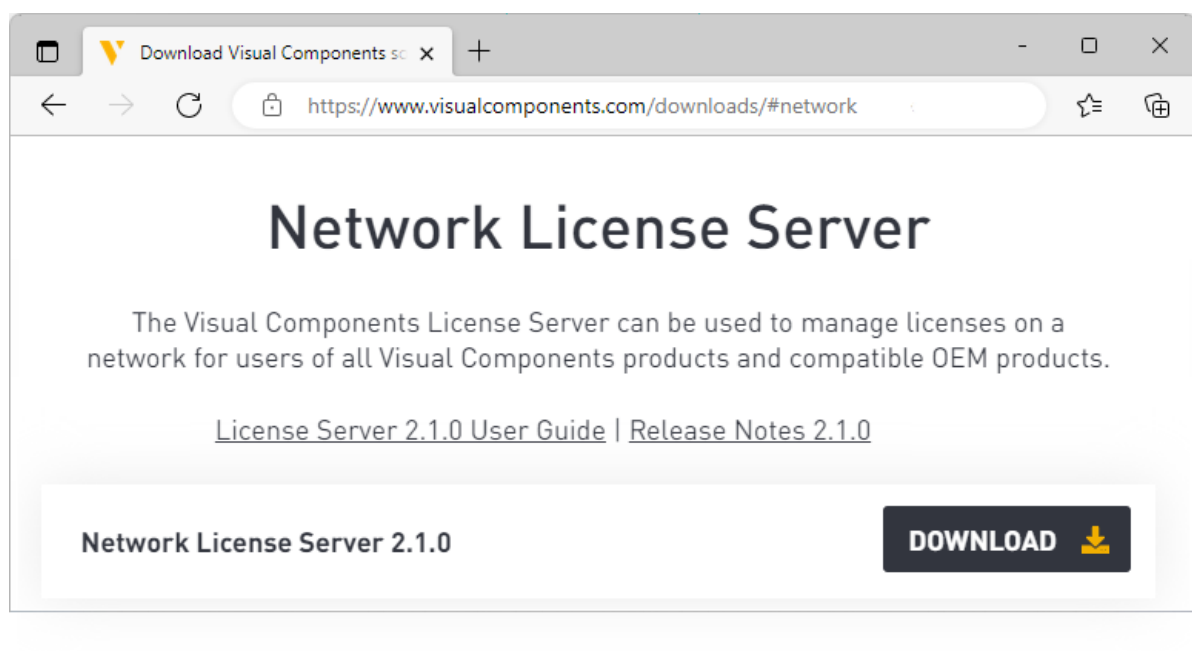

To download the Visual Components License Server Management Console, and the User Guide, visit the Network License Server section of the [Visual Components downloads page](#).

Online Activation

To activate a Network License, your License Admin should already have setup a Network License Server.

Note: For information on setting up your License Admin, refer to the [Upgrade License](#) section below

- To install the Network License Server application, download the installer from the [downloads page](#).
- To manage Network Licenses, refer to the Network License Server User Guide, available from the [downloads page](#).

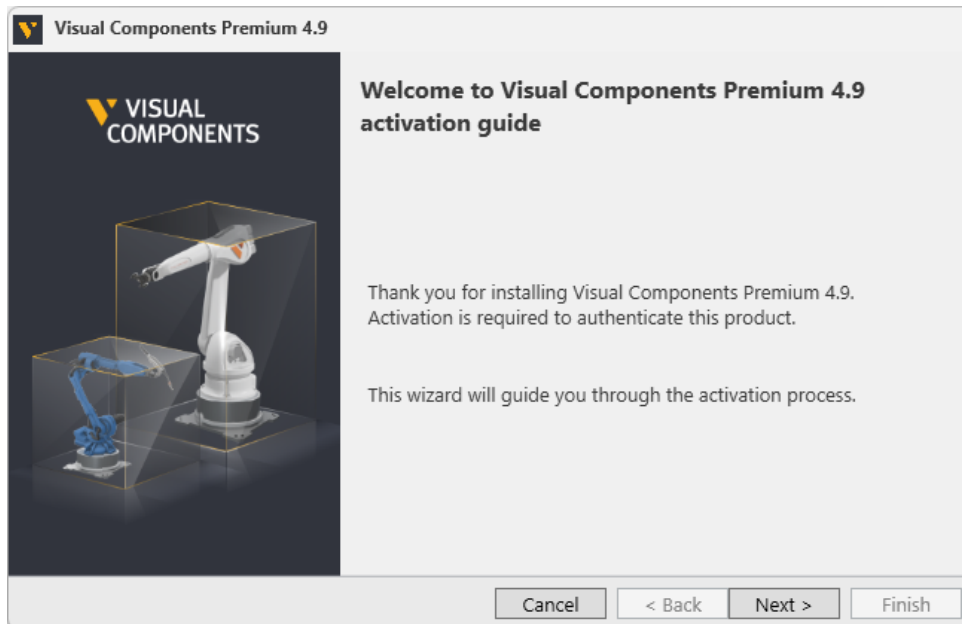

- To configure your network to support a Network License Server refer to the [Frequently Asked Questions](#) section of this document.

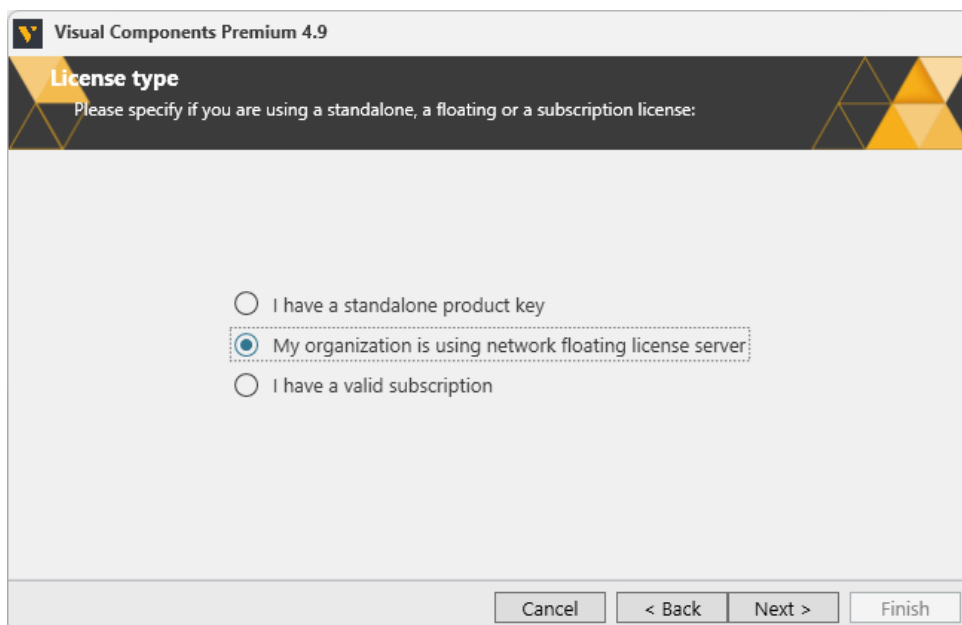

Using a Network License Key

To use your Network License key to activate a Visual Components product, follow these steps:

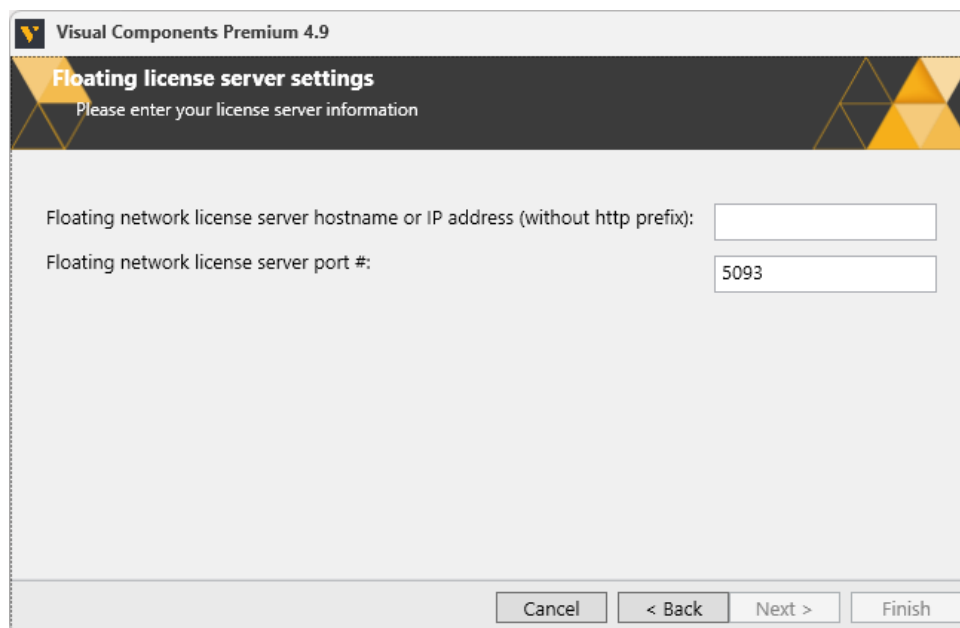

1. Run your Visual Components application.
2. On the **Welcome** dialog, click **Next**.

3. On the License type dialog, select My organization is using network floating license server, then click Next.

4. On the Floating license server settings dialog, type in your Floating network license server host name or IP address (without http prefix) and keep the Floating network license server port number as 5093 (if not modified in the Network License), then click Next.

Visual Components Premium 4.9

Floating license server settings
Please enter your license server information

Floating network license server hostname or IP address (without http prefix):

Floating network license server port #:

Cancel < Back Next > Finish

5. Click **Finish** to complete the Network license setup.

Manual Activation

For instructions on how to manually activate your Network License, refer to page 14 of the Network License Server User Guide available [here](#).

Deactivation

To deactivate a Network License refer to pages 15 and 16 of the Network License Server User Guide available [here](#).

Activation renewal

To renew a Network License refer to page 17 of the Network License Server User Guide available [here](#).

Upgrade License

Software license upgrades require a designated License Admin User. The License Admin is a first point of contact and the only person in your organization entitled to request version upgrades.

- You only need to register a License Admin once.
- Only one License Admin User per company can be registered.
- You must provide a valid email address for the License Admin.
- To register a License Admin User, please submit a request at visualcomponents.com/license-management

When upgrading your software license(s) please note the following:

- A new software license key is required to install and activate Visual Components 4.8. And you can upgrade your current license free of charge if you have a valid maintenance contract.
- A Visual Components product key can only be used for the specified version. For example, a 4.8 Premium product key can be used only for Visual Components Premium 4.8. Therefore, every version needs a separate product key.
- Users with valid maintenance, can upgrade to the latest version for free, for example VC Product¹ 4.0/4.1/4.2 to VC Product 4.8.
- To request an upgrade your License Admin should submit a request at visualcomponents.com/upgrade-license/
- Upgrade requests are validated and upgraded keys will be delivered to the registered License Admin User only.
- Requests will be answered within 2 working days.
- Please note when upgrading to the new version, your old perpetual keys will become inactive after 90 days, and time-limited keys will become inactive after 30 days.
- Before upgrading license keys, the Admin User should check that their Network License Server installation is up to date. To install the latest version of the Network License Server application, visit the [Network License Server section](#) of the Visual Components download page.

¹ VC Product refers to Visual Components Essentials/Visual Components Professional/Visual Components Premium application.

Command line deployment

A command line interface can be used to deploy Visual Components product.

Command line deployment

The installer consists of an EXE bootstrapper that launches a MSI installer. The EXE bootstrapper supports some command-line options which can be found by running the installer with the following parameter:

```
/help
```

Additionally, the installer supports all msixexec command-line options (all command-line parameters you can use for an MSI package). A command-line received by the EXE bootstrapper will be passed to msixexec when launching the main MSI.

Command-line switches order

When passing proprietary command-line parameters to an EXE setup, you cannot mix them with the standard MSI parameters. The correct order is to first specify the proprietary EXE switches and then the standard MSI switches.

For example, a correct command-line would be:

```
visualComponents.exe /exenoui /qn /norestart
```

Where `/exenoui` is an EXE parameter and `/qn`, `/norestart` are MSI parameters.

Fully silent installation

Two parameters are required for a silent installation where no UI (User Interface) is shown to the user. A third parameter for not restarting the PC after installation is optional. Note that the order of the parameters should be as in the usage example below:

`/exenoui` - (needs to be passed before MSI parameters).

`/qn` - no UI is shown.

`/norestart` - the machine will not be restarted when the installation is complete.

Usage example:

```
visualComponents.exe /exenoui /qn /norestart
```

Alternative options for showing some UI during installation

`/quiet` - quiet mode displays the installer UI but does not require user interaction.

`/passive` - displays only the installation progress bar, does not require user interaction.

When installing it is possible to exclude features as listed in the [Features](#) section. To exclude specific features the following parameters can be used comma separated inside a `REMOVE=""` command.

`vcm` - exclude the .vcm File Type Association

`vcmx` - exclude the .vcmx File Type Association

`KUKA.OLP` - exclude the KUKA.Sim AddOn

`Doosan` - exclude the KUKA.Sim AddOn

Usage example:

```
visualComponents.exe /quiet ADDLOCAL=ALL REMOVE="vcm,vcmx,KUKA.OLP,Doosan"
```

Restart Options

`/norestart` - the machine will not be restarted when the installation is complete.

`/promptrestart` - the user will be prompted if a restart is required.

`/force` - restart the machine will be restarted when the installation is complete.

Custom Installation Path

`APPDIR=""` - Specify the desired installation path by passing the path string between the quotation marks.

Usage example:

```
visualComponents.exe /exenoui /qn APPDIR="C:\Program Files\MyFolder"
```

Uninstallation

`/uninstallinst <Product Instance>`

Uninstalls an instance of the product, i.e:

```
visualComponents.exe /uninstallinst "Visual Components Premium 4.9.0" /qn
```

License settings

To prefill license information (license key or floating license information) the following parameters can be used where `PRODUCT_LICENSE_SETTINGS` allows setting three values separated by a vertical bar “|” symbol:

```
"{license key}|{floating license server ip or host}|{ floating license server port}"
```

Usage example:

```
VisualComponents.exe /exenoui /qn PRODUCT_LICENSE_SETTINGS="VCP49-XXXX-XXXXX-X"|Network_Server|5093"
```

Frequently Asked Questions

- Do I need to configure a firewall on my network to access Visual Components Network License Server?
 - a. Network Access: Firewall needs to be configured to allow UDP traffic on the chosen port (default is 5093).
 - b. Internet Access: Access to the Internet (HTTPS) is required on the server for automatic license activation.

Additionally:

- c. Every client needs to be able to access the local network server through the defined access point to use Visual Components products with network licenses.
 - d. Distributing network licenses over the Internet is explicitly not supported by the network license server as stated in the End User License Agreement (EULA) for Visual Components products.
- How do I create a Visual Components Customer Account that I can use to register my software license keys?
 - a. You can create a Customer Account using Visual Components software, refer to the [Register Product Key](#) section.
 - b. Or you can create a Customer Account online through the Visual Components Customer Portal at license.visualcomponents.net.

Should any user still require assistance, then please contact Visual Components Support via email at support@visualcomponents.com
